

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves while handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PRACTICAL TREATMENT: (First Aid: If swallowed: Promptly drink a large quantity of water. Do not induce vomiting. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance contact the Regional Office of EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion.

SPECIAL PRECAUTIONS

PLEASE READ BEFORE OPENING CONTAINER

PREVENTION OF PHYSICAL INJURY

1. This product emits a powerful chlorine gas. Do not open container indoors. Hold away from face when opening to avoid breathing fumes.

2. This product is dangerous when not used properly.

MISUSE MAY RESULT IN SERIOUS PERSONAL INJURY REQUIRING HOSPITALIZATION

RELATED COMPLICATIONS MAY LEAD TO DEATH

Do not mix with any other chemicals

Mixing with other chemicals may cause a violent and instantaneous chemical reaction.

Do not add water to this product

Do not add this product to water in a pool

Do not take advice from others

Do not experiment

Follow label instructions exactly.

PREVENTION OF PROPERTY DAMAGE: Contact between this product in its undissolved state and vinyl liners, painted surfaces or other property in or around the pool will result in permanent bleaching of the color.

Manufactured by ALUMIN LEADS, INC.

55 Jacobus Ave.

St. Keaney, NJ 07032

NET WEIGHT 4 LBS.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

1. Add just water pH to 7.2 - 7.8. For pools with copper plumbing best pH factor is 7.6 - 7.8.
2. If the pool has not been previously stabilized add Conditioner and Stabilizer (cyanuric acid). Follow the directions for use on the label for that product.
3. Dose using the method below best suited for your particular pool.

INITIAL DOSAGE: Add three tablets for every 8,000 gallons of pool water. Each tablet weighs 58 gm. This should be sufficient to satisfy the demand of raw water in establishing a chlorine residual. If there is no chlorine residual the following day, repeat dosage until chlorine residual of 1.0 ppm-1.5 ppm is found 24 hours later prior to any additional dosages. Test water frequently with a reliable test kit.

MAINTENANCE DOSAGE: Thereafter add one tablet per 8,000 gallons daily or as needed to maintain minimum chlorine residual of 1.0 ppm - 1.5 ppm as determined by a test kit. During heat wave periods of heavy bathing load more tablets will be required per day to maintain a sufficient chlorine residual. Also check pH to keep in proper range as pH has a direct effect on chlorine action.

NOTE: These tablets reduce the need for the addition of chemicals to adjust pH, but pH should be brought back into range if it falls or climbs due to rain, make up water, wind blown dust or any other reason.

Application should be made using one of the following methods:

FLOATING CHLORINATOR: An appropriate floating chlorinator is one that is designed for quick dissolving tablets. Follow the manufacturer's directions for use.

SKIMMER METHOD: Empty skimmer of all chemicals and/or debris. Make sure the filter is on and water is properly recirculating through skimmer. Remove any chemicals that may be in or on a automatic chemical dispensing device. Place tablets in skimmer, they will dissolve in approximately minutes.

STORAGE AND DISPOSAL: Keep dry in tightly closed container when not in use. Store in a cool well-ventilated area away from heat or open flame. In case of decomposition isolate container in area if possible and flood with large amounts of water. Do not reuse empty container. Rinse a container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area.
