US ENVIRONMENTAL PROTECTION AGENCY 7124-44 6/30/94 OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (TS 767) WASHINGTON, DC 20460 NAME OF PESTICIDE PRODUC NOTICE OF PESTICIDE: REGISTRATION REREGISTRATION Olinder the Lederal Insecticide, Fungicide Slow Tabs 3" Chlorinating and Rodenticide Act, as amended) <u>5 1/3 Ounce</u> NAME AND ADDRESS OF REGISTRANT (Include ZIP code) ~7 Alden Leeds, Inc. 55 Jacobus Avenue South Kearny, NJ 07032 NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number. On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act. A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith. Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others. Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product. Make the following labeling changes before you release the product for shipment: Revise the precautionary and practical treatment statements in your labeling in accordance with the enclosed Attachment A. A stamped copy of the product label is enclosed for your records. Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling. ATTACHMENT IS APPLICABLE SIGNATURE OF APPROVING OFFICIAL

TREE PROPERTY OF THE HEAVE

EPA Form 8570-6 (Rev 5 76)

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

BEST AVAILABLE COP

✓ 100% Soluble

✓ UV Stabilized- 24 hour chlorine residual.

✓ 1 tablet per 5,000 gallons weekly

Slow dissolving

Disinfects, kills algae and bacteria

These tablets are manufactured with the most concentrated form of dry chlorine available today. They are consistent in size and slow dissolving in nature to allow you to reliably dose your pool once a week. This product contains cyanuric acid-a stabilizer that prevents ultra violet light from removing available chlorine from the pool. These tablets allow you to easily maintain proper chlorine residuals and help you to effortlessly produce beautiful, clean spartling water.

### DIRECTIONS FOR USE-

It is in violation of federal law to use this product in a magner incom

1. Adjust water pit to 7.2-7.6 as determined by a test list. For poets with copper plumbing best off factor is 7.6-7.8.

2. If the poel has not been previously stabilized add Conditioner and Stabilizer (cyanunc acid. Follow the directions for use on the label for that product.

on are later as improved.

WINSTABLIZED POOLS: Follow steps 1 and 2 and then add two (2) tablets per 5,000 gallons of pool water to establish a chlorine residual of 1.0-1.5 ppm as determined by test lut. Repeat dosages as needed to maintain a residual of 1.0-1.5 ppm at all times. Thereafter, add 1 tablet per 5,000 gallons per week or as needed to maintain chlorine residual of 1.0-1.5 ppm.

STABILIZED POOLS: Follow step 1 and then add 1 tablet per 5,000 gallons per week or as needed to maintain a chlorne residual of 1.8-1.5 ppm at all times as determined by a test list.

Maintain some flexibility in desing your pool as chlorine demand will vary depending upon factors such as air and water temperature, bather lead, frequency and intensity of rain or thunder storms and pool exposure. Shock your pool weekly during hot warder and less frequency in cooler periods according to instructions provided with the chosen product. Pool whether the patient was the patient and the patient with the patient with the patient was a second or a second or an according to instructions. should not be entered until the chicrine residual is below 3.0 ppm.

Application should be made using 1 of the following methods:
FURATING CHLORIMATOR: Load Roading chlorinator with prescribed dosage as per instructions on that chifumator. Allow chlorinator to float freely in pool. Increase chlorination by increasing dosage or by securing chlorinator in a beak antisted area of the pool. Decrease chlorination by decreasing dosage or by securing chlorinator in Li STRIMMER METHODS: Empty the stumer of all chemicals and/or debris. Place prescribed rosage into stumer basket.

Length of filtration cycle will influence the rate at which the tablets dissolve

INF. LINE ENOSION CINLORINATOR: Load prescribed dosage into chlorinator according to instructions supplies with the chlorinator. Adjust the chlorinator control valves to always maintain the desired chlorine remitte!

Please blate: The pH of these tablets is on the acid side and will tend to reduce the pH an\_aft. Inity of pool water. Proper

pH should be maintained at 72.76 as determined by a test kit through periodic additions of sudium carbonate or sodium hydrogen carbonate.

## Each tablet weighs 151 grams or 5-1/3 cunces 🔒 🕻

STORAGE AND DISPOSAL: Keep product dry in contry closed container when not in use. Store in cool, drysa. A-vant lated area away from heat or open flame. In case of decomposition isolate container in open area is possible and flood with large ounts of water. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area
