PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.
PRACTICAL TREATMENT: (First Aid): If swallowed: Promptly drink a large quantity of water. Do not induce vomiting. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.
ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance contact the Regional Office of EPA.
PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion.

SPECIAL PRECAUTIONS
PLEASE READ BEFORE OPENING CONTAINER
PREVENTION OF PHYSICAL INJURY
 1. This product emits a powerful chlorine gas. Do not open container indoors.
 - Hold away from face when opening to avoid breathing fumes.
 2. This product is dangerous when not used properly.
MISUSE MAY RESULT IN SERIOUS PERSONAL INJURY REQUIRING HOSPITALIZATION
RELATED COMPLICATIONS MAY LEAD TO DEATH
 Do not mix with any other chemicals
 Mixing with other chemicals may cause a violent and instantaneous chemical reaction
 Do not add water to this product
 Do not add this product to water in a pool
 Do not take advice from others
 Do not experiment
 Follow label instructions exactly
PREVENTION OF PROPERTY DAMAGE: Contact between this product in its undissolved state and vinyl liners, painted surfaces or other property in or around the pool will result in permanent bleaching of the color.

Dura Chlor

Stabilized Chlorinator For Vinyl Pools

For:

- Long lasting super chlorination
- Rapid control of algae
- ALL PURPOSE - Use as a SHOCK and for normal daily maintenance!

ACTIVE INGREDIENT
 Sodium Dichloro S-triazine
 90% (35.2%)
 OTHER INGREDIENTS
 (10.0%) (3.5%)

DANGER KEEP OUT OF REACH OF CHILDREN
 PRECAUTIONS ON BACK PANEL BEFORE OPENING CONTAINER

NET WEIGHT
10 LBS.

SUPERCHEMINATION
 This product provides an easy instant method for superchlorination. When starting up a pool at the beginning of the pool season, proper application of this product will provide a high chlorine residual in minutes without the cloudiness associated with other commonly used chemicals.
ALGAE CONTROL
 This product is designed for the quick and easy control of green slime due to algae growth. Within minutes after proper application, algae will begin to be destroyed. This product will dissolve quickly without leaving a residue. Dead algae will drop to the bottom of the pool while the unsightly green color of the water disappears.

DIRECTIONS
FOR USE IN CHEMINATION:
SUPERCHEMINATION: When starting a new pool, superchlorinate to satisfy chlorine demand and to establish an available chlorine residual of 1.0-1.5 ppm (parts per million). To superchlorinate add 1 to 2 lbs. (16 to 32 oz.) per 7,500 gallons of pool water to provide 5 to 10 ppm available chlorine. Use the appropriate application guideline below. The following morning (if not done previously), stabilize the water by adding Stabilizer (cyanuric acid) according to the directions on label. Test with a reliable test kit. Bathers should not be allowed to enter the pool until the chlorine residual has dropped to 3 ppm or less.

DAILY CHEMINATION: Adjust pH to 7.2-7.6. This product should be added daily or as needed at the rate of 1/2 ounce per 1,000 gallons to maintain a chlorine residual of 1.0-1.5 ppm at all times, as determined by a reliable test kit.
SHOCK TREATMENT: Done at the rate of 1-2 lbs. (16 to 32 oz.) per 7,500 gallons of pool water to yield 5 to 10 ppm available chlorine, using the appropriate application guideline below. In some cases when the amount of organics present in the pool does not allow water to respond to the initial dose, a second treatment may be necessary. Allow filter to run continuously being careful to empty strainer basket in front of pump if suction is impeded. Also, there may be a tendency for the filter to clog due to the accumulation of dead algae. Backwash filter if this occurs. Repeat dosage on second day if necessary. If there is no improvement on the third day, consult your dealer or the manufacturer of this product for further advice. Bathers should not be allowed to enter the pool until the chlorine residual has dropped to 3 ppm or less.

Application should be made by using one of the following methods:
SKIMMER: Use this method to avoid bleaching vinyl liner or paint. Empty skimmer of all chemicals and debris. Make sure that filter is on and that water is properly recirculating through skimmer. Remove any chemicals that may be in an in-line automatic chemical dispensing device. Pour this product slowly into this weir, making sure that the material is drawn into the system at the same rate; do not allow this material to accumulate as gases generated may cause an explosion.
POUR DIRECTLY INTO POOL: Broadcast dosage across surface of water. To prevent floor damage, use skimmer method above.
NOTE ON POOLS TREATED FOR ALGAE: If this product is used to shock or superchlorinate an algae infested pool, after treatment it is important to brush the walls and floor to expose algae that may be in cracks or wrinkles that might protect algae from high chlorine residuals. Such protected algae will begin to reproduce again when high chlorine residual falls.
STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in cool, dry, well-ventilated area away from heat or open flame. In case of decomposition, dispose container in open area if possible and flood with large amounts of water. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area.

EPA REG. NO. 7124-00
