

Highly corrosive. Causes skin and eye damage. May cause a swallowed chemical to burn in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

This product is for use in fish ponds, streams, ponds, or public waters unless in accordance with an EPA-approved label. Do not contact the regional office of EPA.

Agent: Mix only with water. Use clean dry utensils. Do not add this product to any existing day or nighting remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with oil, grease, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible evolution of fire and explosion. In case of contamination or decomposition, do not use. Dispose of this product in a safe container in open and well-ventilated area. Flush with large volumes of water if necessary.

If swallowed, feed clean soaked milk. If used by, drive or in moving. Call a physician immediately. If on skin, brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes, flush with cold water for at least 15 minutes. Get medical attention.

1. This product has a powerful chlorine odor. Hold away from face when opening in a well-ventilated area.
2. Prolonged contact between this product in its undissolved state and any other undissolved surfaces will result in bleaching of the vinyl or plastic. Introduce this product through the skimmer or in a prescribed feeder to avoid discoloration of the pool.
3. When adding this product to a skimmer or feeder make sure there are no other chemicals present as a violent reaction may occur. It is always dangerous to mix chemicals.
4. Use this product as directed as per instructions on label. Do not take advantage of others or experiment by yourself.
5. If this product is used to shock or superchlorinate a pool, after treatment, it is important to brush walls and floor to excite a gas that may be in the walls. It is also important to excite a gas from high chlorine residual. Such protected algae will begin to reproduce again when high chlorine residual is.
6. This product because of its potent formula, can be dangerous if misused properly. Do not
