

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PRACTICAL TREATMENT: First Aid: If swallowed: Promptly drink a large quantity of water. Do not induce vomiting. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES permit. For guidance contact the Regional Office of EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion.

SPECIAL PRECAUTIONS

PLEASE READ BEFORE OPENING CONTAINER

PREVENTION OF PHYSICAL INJURY

1. This product emits a powerful chlorine gas. Do not open container indoors. Hold away from face when opening to avoid breathing fumes.
2. This product is dangerous when not used properly.

**IRRITATION MAY RESULT IN SERIOUS PERSONAL INJURY REQUIRING HOSPITALIZATION
RELATED COMPLICATIONS MAY LEAD TO DEATH**

- Do not mix with any other chemicals
- Mixing with other chemicals may cause a violent and instantaneous chemical reaction
- Do not add water to this product
- Do not add this product to water in a pool
- Do not take advice from others
- Do not experiment

Follow label instructions exactly.

PREVENTION OF PROPERTY DAMAGE: Contact between this product in its undissolved state and vinyl liners, painted surfaces or other property in or around the pool will result in permanent bleaching of the color.

FOR SPARKLING POOLS

m-clo

7 OZ. 7 DAY SLOW DISSOLVING CHLORINATING TABLETS

designed to be used in Floating or Automatic Chlorinators/continuous 24 hour available chlorine
residuals 100% soluble/once a week application or as needed
BACTERIACIDE—ALGAEICIDE—DISINFECTANT

Active ingredient
Trichloro-s-triazinetrione 99.9%
Inert ingredient 0.1%
Total 100% Available Chlorine

**KEEP OUT OF REACH OF CHILDREN
DANGER**

NET WEIGHT 5 LBS.

7oz. 7 Day Slow Dissolving Chlorinating Tablets are manufactured with the most concentrated form of dry chlorine available today. They are convenient in use and slow dissolving in nature to allow you to reliably dose your pool once a week. Slow Dissolving Chlorinating Tablets contain cyanuric acid - a stabilizer that prevents ultra violet light from removing available chlorine from the pool. 7oz. 7 Day Slow Dissolving Chlorinating Tablets allow you to easily maintain proper chlorine residuals and help you to effortlessly produce beautiful, clean sparkling water.

DIRECTIONS FOR USE

It is in violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Adjust water pH to 7.2-7.6 as determined by a test kit. For pools with copper plumbing test pH factor is 7.5-7.8.
2. If a pool has not been previously stabilized add Conditioner and Stabilizer (cyanuric acid). Follow the directions for use on the label for that product.

UNSTABILIZED POOLS: Follow steps 1 and 2 and then add two (2) tablets per 6,000 gallons of pool water to establish a chlorine residual of 1.0-1.5 ppm as determined by test kit. Repeat dosages as needed to maintain a residual of 1.0-1.5 ppm at all times. Thereafter, add 1 tablet per 6,000 gallons per week or as needed to maintain chlorine residual of 1.0-1.5 ppm at all times as determined by a test kit.

STABILIZED POOLS: Follow step 1 and then add 1 tablet per 6,000 gallons per week or as needed to maintain a chlorine residual of 1.0-1.5 ppm at all times as determined by a test kit. Monitor water availability in doing your pool as chlorine demand will vary depending upon factors such as air and water temperature, bather load, frequency and intensity of rain or thunder storms and pool exposures. Shock your pool weekly during hot weather and less frequently in cooler periods according to instructions provided with the chlorine product.

Application should be made using 1 of the following methods:

FLOATING CHLORINATOR: Load floating chlorinator with prescribed dosage as per instructions on that chlorinator. Allow chlorinator to float freely in pool. Increase chlorination by increasing dosage or by securing chlorinator in a highly exposed area of the pool. Decrease chlorination by decreasing dosage or by securing chlorinator in an area of less exposure.

SKIMMER METHOD: Empty the skimmer of all chemicals and/or debris. Place prescribed dosage into skimmer basket. Length of filtration cycle will influence the rate at which the tablets dissolve.

BE-LINE® ENDURON CHLORINATOR: Load prescribed dosage into chlorinator according to instructions supplied with the chlorinator. Adjust the chlorinator control valves to always maintain the desired chlorine residual.

PLEASE NOTE: The pH of 7oz. 7 Day Slow Dissolving Chlorinating Tablets is on the acid side and will tend to reduce the pH and alkalinity of pool water. Proper pH should be maintained at 7.2-7.6 through periodic additions of sodium carbonate or sodium hydrogen carbonate.

Each Tablet weighs 198.5 grams or 7.0 ounces

POOL GALLON CALCULATOR (all dimensions in feet)

Square or Rectangular: Length x Width x Average Depth x 7.5 = Gallons

Round or Oval: Length x Width x Average Depth x 5.9 = Gallons

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in cool, dry, well-ventilated area away from heat or open flame. In case of decomposition isolate container in open area if possible and flood with large amounts of water. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area.
