 RE-REGISTRATION

(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

TERM OF ISSUANCE

NAME OF PESTICIDE PRODUCT

Sparkle Shock

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Alden Leeds, Incorporated
55 Jacobus Avenue
South Kearny, NJ. 07032

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others. This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

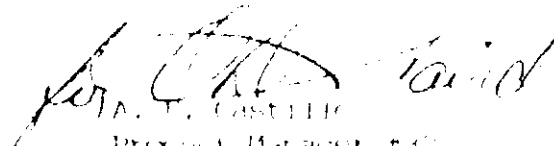

1. Submit and/or cite all data required for registration/re-registration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data or products to submit such data.

2. Add the phrase "EPA Registration No. 7124-89" to your label before you release the product for shipment.

3. Submit five copies of your final printed labeling before you release the product for shipment. Refer to the A-79 Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

6. This product, because of its potent formulation, can be dangerous if not used properly. Do not mix with any other chemicals. This could result in a violent chemical reaction. Do not add water to this product in a closed container. Do not add this product to a small amount of water in a pail. When adding this product to skimmer make sure pump is on and water is circulating so that material is drawn into recirculation system. Do not allow build-up of dry material in skimmer as gases generated may cause an explosion.

for sparkling hot water.

Shock

BPA WATER CARE

Effective use of all spa sanitizers depends on maintaining proper water balance. The following ranges are highly recommended:

- Total Alkalinity 125-150 ppm
- Calcium Hardness 200-300 ppm
- Residual Available Chlorine 2.0-3.0 ppm
- Cyanuric Acid (Incoro) 0 ppm. (Outdoors) 80 ppm

DIRECTIONS

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

Shock is compatible with all spa sanitizers, but always add spa chemicals separately. Use a reliable test kit with fresh solutions for pH and chlorine testing. Add Shock daily when the water appears dingy or hazy from bathers contamination. Turn off the air-blower and circulation system. Sprinkle Shock into water at the rate of one ounce per 250 gallons. The granules will dissolve completely within seconds and liberate 10 ppm of available chlorine. Allow the resulting reaction to proceed 10-15 minutes before covering the spa. Turn on the circulation system. Bathers should not re-enter the spa until the available chlorine residual falls to 3.0 ppm.

Before using the spa, shower in order to avoid adding soap, lotions, or oils from the body into the water. Do not add food or beverages to the water. Avoid overloading the spa.

Shock should not be used more than once a day. If the spa is used daily, it should be drained and fresh-filled about once a month.

STORAGE AND DISPOSAL

Keep this product dry in tightly closed container, when not in use. Store in a cool, dry, well-ventilated area, away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before dismantling this container. Do not reuse empty container but place in trash collection. Do not contaminate water, food, or feed by storage or disposal, or cleaning of equipment.

PRECAUTIONARY HAZARDS TO HUMANS AND DANGER: Highly corrosive. Causes fatal if swallowed. Do not get in eyes, goggles or face shield and rubber gloves and throat. Avoid breathing dust, clothing, or fire cause.

PHYSICAL AND CHEMICAL HAZARDING AGENT: Strong Oxidizing Agent. Do not add this product to dry remnants of any other product. No reaction leading to fire or explosion. Contact with other chemicals may start a reaction of heat, liberation of hazardous gas, fire and explosion. In case of contact with skin, flush with water. If possible isolate and isolate area. Flood with large volumes of water.

PRACTICAL TREATMENT (FIRST AID): Inhaled: Washed in milk followed by other treatment.

On skin: Brush off excess chemical at least 15 minutes. If irritation persists: Flush with cold water for attention.

ENVIRONMENTAL HAZARDS: Do not discharge into lakes, streams, or waterways without a NPDES Permit. Follow office of EPA.

SPECIAL PRECAUTIONS

1. This product has a powerful chlorine oxidizing to avoid breathing fumes.
2. Prolonged contact between this product and vinyl liners or painted surfaces will cause paint. Introduce this product through feeder to avoid discoloration of liner.
3. When adding this product to skimmer, no other chemicals present as a violent reaction may occur.
4. Use this product as directed as per advice from others or experiment by you.
5. If this product is used to shock treatment it is important to brush with water in cracks or wrinkles that might be residual. Such protective algae with high chlorine residual falls.
