U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Antimicrobials Division 7510C
1200 Pennsylvania Avenue, N.W.
Washington, D.C. 20004

EPA Reg.
Number:

7124-111

Date of Issuance:

FEB 6 2003

NOTICE OF PESTICIDE:

 X Registration
 Reregistration

Term of Issuance:

Conditional

Name of Pesticide Product:

Trichlor Granular

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Alden Leeds, Inc.
55 Jacobus Avenue
So. Kearny, NJ 07032

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.

2. Make the following label changes before your release the product for shipment:

- a. Revise the "EPA Registration Number to read, "EPA Reg. No. 7124-111".
- b. Under the "First Aid" statement place the "Hot Line Number" and "Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage".

3. Submit two copies of the revised final printed label for the record.

4. Pending is the final report of the Good Laboratory Practices (GLP) study for storage stability and corrosion characteristics.

Signature of Approving Official:

Robert S. Brennis, PM 32

Date:

FEB 6 2003

Page 2 of 2
EPA Reg. No. 7124-111

5. The Formulator's Exemption does not apply since you are formulating from your own source product. The CSF has been amended to show the registration number of the source product.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

PRECAUTIONARY STATEMENTS

DANGER - HAZARD TO HUMANS AND DOMESTIC ANIMALS

Corrosive: Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or clothing. Do not breathe dust, vapor or spray mist. Irritating to nose and throat. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

FIRST AID:

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice.

IF IN EYES: Hold eye open and rinse slowly with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

ENVIRONMENTAL HAZARD

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of EPA.

PHYSICAL OR CHEMICAL HAZARD

Strong oxidizing agent. Contact with water slowly liberates irritating and hazardous chlorine containing gases. Decomposes at temperatures above 437°F (225°) with liberation of harmful gases. When ignited, will burn with the evolution of chlorine and equally toxic gases.

IN CASE OF FIRE OR SMOKE: Call the fire department. Do not attempt to extinguish the fire without a self contained breathing apparatus (SCBA). Do not let the fire burn. Flood with copious amounts of water. Do not use ABC or other dry chemical extinguishers since there is the potential for a violent reaction.

IN CASE OF CONTAMINATION OR DECOMPOSITION: Do not reseal container. Neutralize material to a non-oxidizing state for safe disposal.

TRICHLOR GRANULAR

ACTIVE INGREDIENT:

Trichloro-s-triazinetriene* 99.0%

OTHER INGREDIENTS: 1.0%

*Provides 90% Available Chlorine 100.0%

**KEEP OUT OF REACH OF CHILDREN
DANGER
SEE FIRST AID STATEMENT AND OTHER
PRECAUTIONS ON SIDE PANEL
BEFORE OPENING CONTAINER**

Net Wt. 50 lbs. (22.75 kg.)

This product is the most highly concentrated stabilized cyanuric based disinfectant developed to establish an initial chlorine residual through superchlorination and to maintain proper levels of available chlorine through normal daily maintenance.

This product is easy to dispense and 100% soluble.

DIRECTIONS FOR USE:

It is in violation of federal law to use this product in a manner inconsistent with its labeling.

INITIAL DOSAGE: When starting up a new pool, superchlorinate to satisfy chlorine demand and to establish an available chlorine residual of 1.0 to 1.5 ppm. Add 1 to 1-1/2 ounces of this product per 1,000 gallons which will provide 6.7-10 ppm available chlorine. Test with a reliable chlorine test kit. The next morning add Conditioner and Stabilizer (cyanuric acid) to stabilize the pool, according to the directions on that label. Bathers should not be allowed to enter the pool until the chlorine residual has dropped to 3 ppm or less.

MAINTENANCE DOSE: Add 1/4 to 1/2 ounce per 1,000 gallons per day to maintain a chlorine residual at all times of 1.0 to 1.5 ppm, as determined by a suitable test kit. pH should be maintained in the range of 7.2-7.6.

SHOCK TREATMENT: A shock treatment should be made every week during hot weather or after heavy rains. Less frequent shock treatments may be made during cool weather. Add 1-1/2 ounces per 1,000 gallons. Bathers should not be permitted to enter the pool until chlorine residual has dropped to 3 ppm or less.

Note that daily dosages should vary to compensate for heavy accumulations of dust and dirt caused by storms or heavy bather loads. Additional dosages may be required to maintain a chlorine residual of 1.0-1.5 ppm.

Application should be made using one of the following methods:

SKIMMER METHOD: Use this method to avoid bleaching vinyl liner or paint. Empty skimmer of all chemicals and debris. Make sure that filter is on and that water is properly recirculating through skimmer. Remove any chemicals that may be in an in-line automatic chemical dispensing device. Pour this product slowly into skimmer, making sure that the material is drawn into the system at the same rate; do not allow this material to accumulate as gases generated may cause an explosion.

DOSE DIRECTLY INTO POOL: Broadcast dosage across surface of water. To prevent liner damage, use skimmer method above.

POOL GALLON CALCULATOR (all dimensions in feet)

Square or Rectangular:

Length x Width x Average Depth x 7.5 = Gallons

Round or Oval:

Length x Width x Average Depth x 5.9 = Gallons

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition isolate container in open area if possible, and flood with large amounts of water. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area.
