Heather R. Bjornson, Agent
for Seaboard Industries
c/o Technology Sciences Group Inc.
1150 18th Street N.W.
Suite 1000
Washington D.C. 20036

Subject: Application for Amendment dated January 22, 2008
Seaboard SEA/CHLOR
7152-15

Dear Ms. Bjornson:

The Agency has reviewed your amendment submitted in accordance with continuing registration under the Federal Insecticide Fungicide and Rodenticide Act (FIFRA), as amended, and determined the action acceptable. Your request to change the quantity of the pool water from 50,000 gallons to 5000 gallons is acceptable. A copy of your stamped label is enclosed.

Should you have any questions or comments concerning this letter, please contact Tom Luminello at (703) 308-8075.

Sincerely,

for Wanda J. H.

FIRST AID	
If in eyes	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15 – 20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.
If on skin or clothing	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15 – 20 minutes. • Call a poison control center or doctor for treatment advice.
If swallowed	<ul style="list-style-type: none"> • Call poison control center or doctor immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by the poison control center or doctor. • Do not give anything by mouth to an unconscious person.
If inhaled	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. • Call a poison control center or doctor for further treatment advice.
<p>Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergency assistance involving chemicals call CHEMTREC day or night at: 1-800-424-9300.</p> <p>NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.</p>	

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals.
DANGER: Corrosive. Causes irreversible eye damage. Do not get in eyes or on clothing. Wear safety glasses or goggles and protective gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until strong odors has dissipated.

ENVIRONMENTAL HAZARDS
 This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public water unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water board or regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARDS
STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with chemicals (e.g. ammonia, acids, detergents, etc.) or organic matter (e.g. urine, feces etc.) will release chlorine gas which is irritation to eyes, lungs and mucous membranes.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Sanitizer for Swimming Pools

After filling or at the start of each season, the pool water should be adjusted for pH (7.2-7.6) using pH control agents (Minus, Plus & Alka/Lite) as directed. Initially, two (8 oz.) cups of SEA/CHLOR per 5,000 gallons of pool water is added to develop the proper chlorine level of 1-2 ppm. To prevent chlorine decomposition and provide a balanced, economical pool sanitation program, Stabilizer is added according to label instructions. Further Sanitizer addition should be made to continue chlorine level activity at 1-2 ppm as required.

HOW TO MAINTAIN THE PROPER CHLORINE RESIDUAL

The available chlorine content of the swimming pool should be maintained between 1.0-1.5 ppm. Under normal conditions, this can be maintained by daily addition of 2.7 oz. (1/3 cup) of SEA/CHLOR for each 5,000 gallons of pool water. Severe conditions such as high temperature, excessive use by many people will require higher daily dosage than the smaller dose in the spring and fall when there isn't any bathing activity.

The pool water should be superchlorinated once a week or better. Five times the normal addition, or a minimum of one cup (eight ounces) per 5,000 gallons of pool water should be added in the evening when the pool is not in use for a minimum of 12 hours. If chlorine residual is above 2 ppm, usage of the pool should not be permitted until it is decreased. Reentry into treated pools is prohibited above levels of 3 ppm due to risk of bodily injury.

STORAGE AND DISPOSAL

Do not contaminate food or feed by storage, disposal or cleaning of equipment.

Pesticide Storage: Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration.

Pesticide Disposal: In case of spill, flood areas with large quantities of water. Product or rinsates that cannot be used should be diluted with water before disposal in a sanitary sewer.

Container Disposal: Do not reuse empty container but place in trash collection.
