JUN 24 2014

Subject: Seaboard SEA/CHLOR  
EPA Reg.#: 7152-15  
Application Date: April 18, 2014  
Receipt Date: April 18, 2014

Dear Ms. Downs:

This acknowledges the receipt of your Amendment application dated April 18, 2014 in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended.

**Proposed Amendment:**

Minor amendments to Precautionary Statement and update the Storage & Disposal statement for Seaboard SEA/CHLOR product label (EPA Reg#7152-15). The proposed label dated April 18, 2014 (pin punch 4/18/14).

**General Comment:**

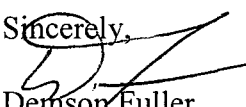

Based on the review of the material submitted, the amendment for "Seaboard SEA/CHLOR" product label (EPA Reg# 7152-15) is **acceptable**.

**A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. The next label printing of this product must use this labeling unless subsequent changes have been approved. You must submit one (1) copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.**

This latest amended label and a copy of this letter have been inserted in your file for future reference.

If you have any questions or comments concerning this letter, please contact David Liem by email at [liem.david@epa.gov](mailto:liem.david@epa.gov) or call (703) 305-1285.

Sincerely,

  
Demson Fuller

**PRECAUTIONARY STATEMENTS**

Hazards to Humans and Domestic Animals.

**DANGER:** Corrosive. Causes irreversible eye damage. Do not get in eyes or on clothing. Wear safety glasses or goggles and protective gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until strong odors have dissipated.

**ENVIRONMENTAL HAZARDS**

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public water unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water board or regional Office of the EPA.

**PHYSICAL OR CHEMICAL HAZARDS**

**STRONG OXIDIZING AGENT:** Mix only with water according to label directions. Mixing this product with chemicals (e.g. ammonia, acids, detergents, etc.) or organic matter (e.g. urine, feces etc.) will release chlorine gas which is irritation to eyes, lungs and mucous membranes.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**Sanitizer for Swimming Pools**

After filling or at the start of each season, the pool water should be adjusted for pH (7.2-7.6) using pH control agents (Minus, Plus & Alka/Lite) as directed. Initially, two (8 oz.) cups of SEA/CHLOR per 5,000 gallons of pool water is added to develop the proper chlorine level of 1-2 ppm. To prevent chlorine decomposition and provide a balanced, economical pool sanitation program, Stabilizer is added according to label instructions. Further Sanitizer addition should be made to continue chlorine level activity at 1-2 ppm as required.

**HOW TO MAINTAIN THE PROPER CHLORINE RESIDUAL**

The available chlorine content of the swimming pool should be maintained between 1.0-1.5 ppm. Under normal conditions, this can be maintained by daily addition of 2.7 oz. (1/3 cup) of SEA/CHLOR for each 5,000 gallons of pool water. Severe conditions such as high temperature, excessive use by many people will require higher daily dosage than the smaller dose in the spring and fall when there isn't any bathing activity.

The pool water should be superchlorinated once a week or better. Five times the normal addition, or a minimum of one cup (eight ounces) per 5,000 gallons of pool water should be added in the evening when the pool is not in use for a minimum of 12 hours. If chlorine residual is above 2 ppm, usage of the pool should not be permitted until it is decreased. Reentry into treated pools is prohibited above levels of 3 ppm due to risk of bodily injury.

**STORAGE AND DISPOSAL**

Do not contaminate food or feed by storage, disposal or cleaning of equipment.

**Pesticide Storage:** Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration.

**Pesticide Disposal:** In case of spill, flood areas with large quantities of water. Product or rinsates that cannot be used should be diluted with water before disposal in a sanitary sewer.

**Container Disposal:** Nonrefillable container. Do not reuse or refill this container. Clean container promptly after emptying. Then offer for recycling, if available, or dispose of in a sanitary landfill or by other procedures approved by state and local authorities.

**Optional Marketing Claims**
