

U.S. ENVIRONMENTAL PROTECTION AGENCY
 Office of Pesticide Programs
 Antimicrobials Division (7510W)
 401 "M" St., S.W.
 Washington, D.C. 20460

EPA Reg. Number:

7152-19

Date of Issuance:

MAY 14 1998

Term of Issuance:

Name of Pesticide Product:

Seaboard Sea/Cure Shock Treatment

NOTICE OF PESTICIDE:
 _____ Registration
 X Reregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Seaboard Industries
 185 Van Winkle Avenue
 Hawthorne, NJ 07507

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

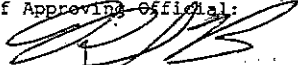

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Make the following labeling changes before you release the product for shipment:

1. The Child Resistant Packaging is Required.
2. Include the word "Poison" and the skull and crossbones symbol immediately below the signal word "DANGER" on the front panel of the label.
3. Under the "Environmental Hazards" statement revise the first sentence to read: "This pesticide is toxic to fish and aquatic organisms".

4. Signature of Approving Official:

 Robert S. Brennis, PM 32

Date:

4. Revise the "Precautionary Statement" to read:

Fatal if inhaled. Corrosive. Causes irreversible eye damage or skin burns. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Do not breathe dust. Wear goggles or face shield. For handling activities, use dust/mist filtering respirator (MSHA/NIOSH approval number prefix TC-21C). Wear protective clothing and rubber gloves. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Remove contaminated clothing and wash clothing before reuse.

5. Revise the "Statement of Practical Treatment" to read:

If Swallowed: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. If person is unconscious, do not give anything by mouth and do not induce vomiting.

If on Skin: Wash with plenty of soap and water. Get medical attention.

If Inhaled: Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention.

If in Eyes: Hold eyelids open and flush with steady, gentle stream of water for 15 minutes. Get medical attention.

6. The proposed label should contain a "Note to Physicians". Some suggested types of information include the following:

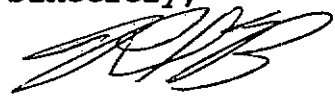

- technical information on symptomatology;
- use of supportive treatments to maintain life functions;
- medicine that will counteract the specific physiological effects of the pesticide;
- company telephone number to specific medical personnel who can provide specialized medical advice.

Probable mucosal damage may contraindicate the use of gastric lavage.

30/5

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Sincerely,

Robert S. Brennis
Product Manager 32
Regulatory Management Branch II
Antimicrobials Division (7504C)

SEABOARD

SEA/CURE

SHOCK TREATMENT

ACTIVE INGREDIENTS: Trichloro-s-triazinetrione* 99%
INERT INGREDIENTS 1%
TOTAL 100%

*Provides 89% Available Chlorine

E.P.A. Reg. No 7152-19

E.P.A. Est. No. 7152-NJ-1

PRECAUTION: Never add directly into pool as it will bleach the liner or painted surface.

KEEP OUT OF REACH OF CHILDREN

ACCEPTED
with COMMENTS
in EPA Letter Dated:

MAY 14 1998

Under the Federal Insecticide,
Fungicide, and Rodenticide Act as
amended, for the pesticide
registered under EPA Reg. No

7152-19

40/5

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its label. After filling or at the start of each season, the pool water should be adjusted for pH (7.2-7.6) using pH control agents (Minus, Plus & Alka/Lite) as directed. Initially, two (8 oz.) cups of SEA / CURE per 5,000 gallons of pool water is added to develop the proper chlorine level of 1-2 ppm. To prevent chlorine decomposition and provide a balanced, economical pool sanitation program, Stabilizer is added according to label instructions. Further Sanitizer addition should be made to continue chlorine level activity at 1-2 ppm as required.

HOW TO MAINTAIN THE PROPER CHLORINE RESIDUAL

The available chlorine content of the swimming pool should be maintained between 1.0-1.5 ppm. Under normal conditions, this can be maintained by daily addition of 2.7 oz. (1/3 cup) of SEA / CURE for each 5,000 gallons of pool water. Severe conditions such as high temperature, excessive use by many people will require higher daily dosage than the smaller dose in the spring and fall when there isn't any bathing activity.

The pool water should be superchlorinated once a week or better. Five times the normal addition, or a minimum of one cup (eight ounces) per 50,000 gallons of pool water should be added in the evening when the pool is not in use for a minimum of 12 hours. If chlorine residual is above 2 ppm, usage of the pool should not be permitted until it is decreased. **STORAGE AND DISPOSAL:** Keep product dry in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash collection. Do not contaminate water, food, or feed by storage or disposal.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Highly corrosive. May cause skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse. Reentry into treated swimming pools /spas is prohibited above levels of 3 ppm of chlorine.

PRACTICAL TREATMENT (FIRST AID): If swallowed, feed bread soaked in milk followed by olive oil. Call a physician immediately. If on skin, brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes, flush with cold water for at least 15 minutes. Get medical attention.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewer treatment plant authority. For guidance, contact your State Water Board or regional office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction leading to generation of heat, and liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal the container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.
