

SEABOARD

GRANULAR STABILIZED CHLORINE

INGREDIENT:

Dichloro-S-Triazinetriene Dihydrate 100%
Chlorine 56%

EPA REG. No. 7152-21

DANGER KEEP OUT OF REACH OF CHILDREN
SEE SIDE PANEL FOR FIRST AID AND ADDITIONAL
PRECAUTIONS.

NET WT. 4 lbs.

PACKED BY:

SEABOARD
INDUSTRIES
HAWTHORNE, NEW JERSEY

DANGER: Strong oxidizing agent. Moisture contamination may liberate irritating and hazardous chlorine-containing gases. Decomposes at 350°F-475°F, with the liberation of harmful gases. In case of contamination, if possible, isolate container in open air or well ventilated area. Flood with large volume of water if necessary.

Mix only with water. Do not mix with other pool chemicals. Use only dry clean measuring utensils. Store in cool dry place. Keep closed when not being used.

Do not reuse container. Rinse empty container with water and discard.

Apply this product only as specified on this label.

DANGER: Keep out of reach of children. Corrosive. Causes eye damage. Do not get into eyes or on skin. Do not breathe dust. May cause skin, nose and throat irritation. Wear safety goggles, dust respirator and protective clothing when handling. May be fatal if swallowed. May cause burns to broken skin.

FIRST AID: In case of personal contact, remove excess material and flush skin of eyes with cold water for at least 15 minutes. For eyes—get medical attention. Clean contaminated clothing before reuse. If swallowed, feed gruel or cooked cereal followed by olive oil or cooking oil. Call Physician immediately.

CAUTION: This product is toxic to fish. Treated effluent water should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning equipment or disposal of wastes.

Comment

DIRECTIONS FOR USE

Surfaces to be sanitized should be thoroughly cleaned and rinsed with a solution of Eccodine I as directed below. Grossly contaminated surfaces should be cleaned using a solution of Eccodine I with agitation and then rinsed with a freshly prepared solution. Solution contact with the surface to be sanitized should be at

DESCRIPTION

Eccodine I is a quick acting germicidal rinse and cleaner. It is based on an iodine complex and is formulated for food plant cleaning and sanitizing. In

MAINTENANCE:

Granular stabilized chlorine should be added daily or as needed at the rate of 1/8 to 1/4 oz. per 1000 gallons of pool water to maintain a chlorine residual of 1.0 PPM to 1.5 PPM as determined by a suitable test kit. pH should be maintained between 7.2 and 7.6. A super-chlorination treatment should be made every week during hot weather or after heavy rains, and less frequently during cooler weather. Keep in mind that a slight flexibility must be maintained in the event of heavy accumulations of dust and dirt caused by storms or super heavy bathing loads which require additional dosages as needed to maintain the chlorine residual between 1.0 PPM and 1.5 PPM. Do not add directly to pool, as it might cause discoloration of liner or paint.

DIRECTIONS: For New Pool,

1. Adjust pool water pH to 7.2 to 7.6 as necessary with "PLUS" or "MINUS"
2. Superchlorinate to satisfy chlorine demand and to establish a chlorine residual of 1.0 to 1.5 PPM available chlorine. To accomplish this, add 2 oz. of stabilized chlorine granular for every 1000 gallons of water.
3. Test pool water with a suitable chlorine test kit about 4 hours after treatment. If there is no chlorine residual, recheck pH with a test kit, and if necessary, readjust as in step No. 1. Repeat the above chlorine dosage until a reading of 1.0 to 1.5 PPM is determined by a test kit.
4. After chlorine residual has been established, condition the pool water with cyanuric acid, 4 oz. for every 1000 gallons of water.

If chlorine residual is above 2.0 PPM, do not allow swimming until chlorine is below 2.0 PPM.
