#### **DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

#### **DIRECTIONS FOR NEWLY FILLED POOLS**

SEA/CURE is added directly to skimmer at the rate of one pound per 800 gallons to establish a residual chlorine value of 1.0-1.5 ppm. This dosage should be repeated until the test results for residual chlorine are in the range of 1.0-1.5 ppm. Sun-Screen protection and stabilization of chlorine in the pool is provided by stabilizer according to label instructions.

#### REGULAR MAINTENANCE TREATMENT

Adjust whatever proportioning mechanism that might be used to assure a constant treatment level of 1.0-2.0 ppm available chlorine in the pool water (normally 1 stick per 7500 gallions weekly). The chlorine level should be checked daily with the use of a suitable test kit. Due to the daily changes in weather, temperature, and bather load, the frequency and the amount of SUPERSTICK 8 added will vary. Pool water pH must be adjusted and maintained regularly in the pH range of 7.2-7.8. For each pound of SUPERSTICK 8, a half pound SEABOARD PLUS is added for pH control.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of decomposition isolate container in open area if possible, and flood with large amounts of water. Do not reuse empty container. Rinsmamphy container thoroughly with water to dissolve all material before discarding. Place in trash collection or dispose in approved landfill area. Do not contaminate feed, food or water by storage or disposal.
