

USE OF PRODUCT

STORAGE AND DISPOSAL

Waste resulting from use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse, if applicable. Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

INDOOR PESTS: For spot application in industrial plants, municipal buildings, schools, motels, hotels, apartment, mess-hall areas of food handling establishments, hospitals and health care institutions.

NON-FOOD AREAS: Includes garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling).

To control cockroaches (including strains resistant to certain other insecticides), ants, clovermites, crickets, firebrats, silverfish, spiders: Use 1 part DICHLORON II with 11 parts of water to control light infestations and 1 part DICHLORON II to 5 parts of water to quickly reduce heavy infestations. For spot treatment, apply as a coarse spray or with a paint brush to localized areas where these pests are found or normally occur, including dark corners of rooms and closets; cracks and crevices along walls, along and behind baseboards; beneath and behind sinks, stoves, refrigerators and cabinets; around plumbing and other utility installations. For ants, apply to ant trails, also around doors and windows and wherever else these pests may find entrances. For clover mites, use the 1 to 5 dilution only.

NOTE: A period of 3 to 7 days is normally required for maximum effect on cockroaches.

FOOD HANDLING ESTABLISHMENTS: Places other than private residences in which exposed food is held, processed, prepared or served.

FOOD AREAS - APPLICATION THROUGH EXHAUST AND SERVICE TREATMENT ONLY: Includes areas for receiving, storing, preparing, canning, bottling, wrapping, boxing, packaging and waste storage and disposal systems, mills, dairies, and laundries, including all areas where food preparation facility is in operation. For general food areas, mix 1 part DICHLORON II with 11 parts water to control light infestations, mix 1 part DICHLORON II with 5 parts water to quickly reduce heavy infestations. Apply as a coarse spray to walls, cracks and crevices, using a pump sprayer or a hand sprayer. Apply a fine stream of insecticide in point blank range to all hollow spaces, walls, equipment, and floors opening leading to the building, especially walls, equipment, and floors, where cockroaches, crickets, firebrats, silverfish, and spiders are found. Do not apply this product in conductors, in or behind electrical panels, or within electrical equipment because of possible electrical hazard.

Do not use where part of the equipment is not covered by the exhaust hood, transition, or air stream pattern from the exhaust.

Do not use in areas where the product will contact exposed surfaces or intrude on the material being treated. Avoid contamination of food or food processing surfaces.

For more information on the use of this product, contact the manufacturer or distributor.
