d-CON CONCENTRATE

Makes 6 Pounds of Bait

Makes 6
pounds of
bait

DIRECTIONS FOR MIXING CONCENTRATE

Use a disposable container, such as a double plastic utility bag. Carefully follow the mixing recipe below.

1. Place into mixing bag 3 pounds of breakfast cereal oats or rolled oats, then 1/2 cup of corn oil, then 1/2 pound rice mixed with 1/2 pound of bread or bread crumbs.

Mix or shake bag vigorously for 2 minutes.

2. Then add 1/2 pound of confectionary sugar, 1 pound flour, and 1/2 pound of d-CON Concentrate.

Mix or shake bag vigorously for 3 to 5 minutes until contents is thoroughly mixed.

DIRECTIONS FOR USE

Use disposable containers, such as plastic dishes or paper plates, as bait trays.

TO KILL NORWAY AND ROOF RATS: Place 4 to 16 ounces of bait in each tray. Maintain a fresh supply of bait for at least 10 days.

TO KILL HOUSE MICE: Place 1/4 to 1/2 ounce of bait (about a tablespoon) in each tray. Place trays at 8 to 12 foot intervals. Maintain a fresh supply of bait for at least 15 days.

BAIT PLACEMENT

Place bait trays in areas where rats and mice feed, water, or travel. Best places are along walls, in corners, and in dark out-of-the-way areas. Cover trays with bait box or board. Never place trays out in the open.

Allow trays to remain undisturbed for at least 2 days. After 2 days check bait trays for evidence of consumption. If half the contents are consumed, place 2 or more fresh trays in the same location. Check again 2 days later and continue to add new trays until a complete lack of feeding is noted.

Evidence of control occurs in 5 days. For complete control, continue baiting for at least 15 days. If there is danger of reinfestation from adjoining property, set up permanent bait stations. Check these bait stations periodically. Remove any spoiled or contaminated bait and replace promptly with fresh bait.

IMPORTANT: Baits should be placed in areas not accessible to children, pets, wildlife, and domestic animals; or placed in tamper-proof bait boxes.

Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

Keep remaining unused bait in a safe, protected place. For identification purposes, place the empty d-CON Concentrate in the plastic bag with the unused bait. When the bait has been used up, be sure to dispose of the mixing bag safely.

KILLS RATS AND MICE

ACTIVE INGREDIENT:
Warfarin [3-(alpha-Acetylbenzyl)-4-hydroxycoumarin] 0.3%
INERT INGREDIENTS 99.7%

Warfarin - a highly purified and refined rodenticide

CAUTION: Keep out of the reach of children.

See other caution on side

NET WEIGHT 8 OZ.

CAUTION: Keep away from humans, domestic animals, and pets. If swallowed by humans, domestic animals, or pets this material may reduce the clotting ability of the blood and cause bleeding. In such cases, intravenous and oral administration of Vitamin K combined with blood transfusions are indicated as in the case of hemorrhage caused by overdoses of bis-hydroxycoumarin.
