### ONLY ROZOL BAITS ARE OIL IMPREGNATED!

To ensure the most effective and highest quality bait, this product has been prepared in a two-step operation.

- 1) The active ingredient was dissolved in oil to form an oil concentrate.
- 2) The bait was impregnated with this oil concentrate and the toxic material completely penetrated the grain.

This process provides the following advantages:

- a) The lethal action begins when the rodent consumes the bait. Impregnation reduces the possibility of the toxic material to detach itself.
- b) The USP grade mineral oil itself enhances bait acceptance and promotes absorption in the rodent's system.
- c) The oil aids in the preservation of the bait even under humid conditions, thus reducing the possibility of rancidity that may cause bait rejection.

These advantages, coupled with the effectiveness of the compound on rats and mice, makes this a highly desirable product, as:

**ONLY ROZOL BAITS PROVIDE ALL THESE EXCLUSIVE FEATURES. LOOK FOR THE ROZOL SYMBOL ON THE LABEL FOR A SUPERIOR PRODUCT**

Active Ingredient:

2-[(p-chlorophenyl) phenylacetyl]-  
1,3-indandione\* 0.005%

Inert Ingredient 99.995%

-----  
100.00%

\*Chlorophacione-Liphadione - Patented in the U.S.A.

### WARNING

#### KEEP OUT OF REACH OF CHILDREN

Keep away from humans, domestic animals and pets. If swallowed or absorbed by humans, domestic animals or pets, this material may reduce the clotting ability of the blood and cause bleeding. In that case, intravenous and oral administration of Vitamin K combined with blood transfusions are indicated as in the case of hemorrhage caused by overdoses of bishydroxycoumarin. Call a physician immediately.

Baits should be placed in areas inaccessible to children, pets, wildlife and domestic animals or in tamper-proof bait boxes.

Use in original container. Destroy when empty.

**GENERAL DIRECTIONS:** Place baits in locations where rats and mice feed, water, and/or travel. Bait placements along walls, in corners, and in concealed locations where rats and mice can feed unobserved are desirable. Contaminated or spoiled baits should be replaced promptly.

Protect bait against access of children, pets, livestock and wildlife.

**FOR RATS:** Each station should contain at least 4 ounces of bait. Maintain constant supply of bait at stations for at least 10 days.

**FOR MICE:** Tablespoon amounts (1/4 to 1/2 ounce) of bait should be placed 8 to 12 foot intervals. An uninterrupted supply of bait should be maintained for at least 15 days.

**NOTICE:** Buyer assumes all responsibility for storage and handling of this material. For first aid and antidotes with directions given here with.

**KEEP AWAY FROM FOODSTUFFS**
