**DIRECTIONS
 FOR USE**

**GENERAL
 DIRECTIONS:**

Place baits in loca-
 tions where rats and
 mice feed, with
 sufficient bait to
 attract them. Do
 not place bait along
 walls in corners, and
 do not place bait
 where rats and
 mice can find food
 elsewhere.

CONTAINER USE

Use bait in a
 bait station or
 bait box.

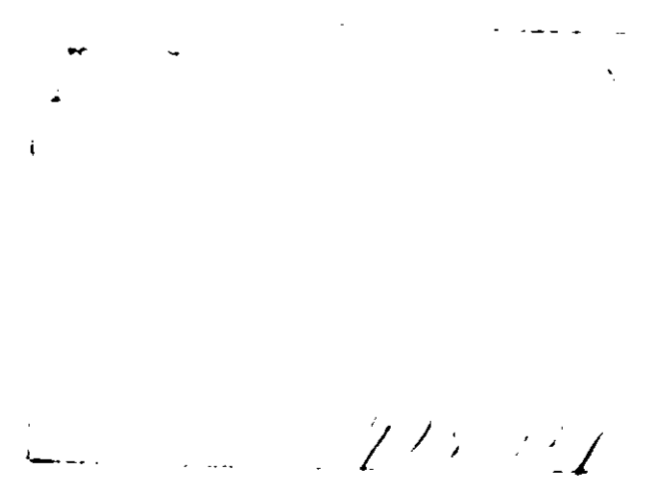

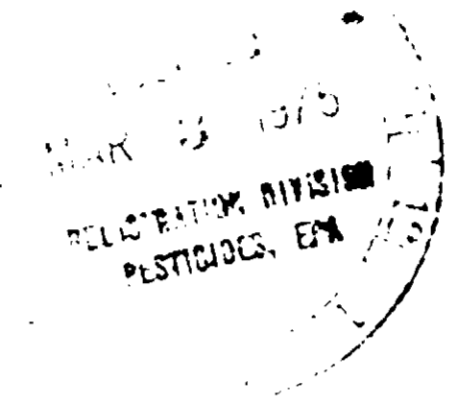

Do not use bait
 where children
 and pets can
 reach it.

FOR RATS:

Place bait in
 bait stations
 in areas where
 rats feed.

FOR MICE:

Place bait in
 bait stations
 in areas where
 mice feed.

THE RAT AND MOUSE KILLER
 (with chlorophacinone)
 Ready-to-Use

The only pre-integrated bait for Rats and
 mouse bait most recently approved by EPA.

ONLY ROTOL BAITS ARE OIL IMPREGNATED!

Rotol baits are the only baits which are actually impregnated with oil. This impregnation is the top secret of Rotol.

1. The impregnation is done in a special process which is not done in any other bait.
2. The bait is impregnated with the oil in a special way and the oil is not lost in any way.
3. The oil is not lost in any way and the bait is not lost in any way.

Rotol bait is the only bait which is impregnated with oil. This impregnation is the top secret of Rotol.

4. The oil is not lost in any way and the bait is not lost in any way.

The oil is not lost in any way and the bait is not lost in any way.
