

ROZOL
ROZOL
 WEATHER RESISTANT
 OIL IMPREGNATED
 RODENTICIDE

GENERAL DIRECTIONS: This product can be used in wet and damp areas as specified below:

INDOORS: Place bait in runways, at feeding and watering areas, behind boards along walls, between walls, and behind nailed openings.

OUTDOORS: Place bait along edges of buildings and beside harborage, feeding, and watering areas where mouse activity has been noted.

FOR HOUSE MICE: Place 1/4 - 1/2 oz. (tablespoon amounts) per placement with stations located at 8 to 12 ft. intervals. Maintain constant supply of bait for at least 15 days.

Contaminated or spoiled baits should be replaced promptly. Do not reuse empty container. Destroy when empty. Treated baits must be placed in locations not accessible to children, pets, wildlife and domestic animals or in tamper proof bait boxes. Do not allow treated bait to be exposed to bare ground. Do not contaminate water by washing of equipment or disposal of wastes. Keep out of eyes, streams or ponds. Apply this product only as specified on this label.

NOTICE: Buyer assumes all risks of use, storage or handling of this material but in strict accordance with directions on the label.

CHEMPAR
ROZOL
 IMPREGNATED
 HOUSE MOUSE
 KILLER

To insure the complete penetration of the bait by the toxicant, this product has been prepared in a two-step operation:

1. The active ingredient was dissolved in mineral oil to form a concentrate.
2. This mineral oil concentrate was then used to impregnate the bait.

This process provides the following advantages:

1. The mineral oil aids in the preservation of the bait, thus reducing the possibility of rancidity that may cause bait rejection.

Impregnation reduces the possibility of the toxicant detaching itself from the bait.
