OIL IMPREGNATED  
RODENTICIDE  
READY TO USE MEAL  
OIL IMPREGNATED MEAL

**GENERAL DIRECTIONS:** Can be used in wet and damp areas as specified below.

**INDOORS:** Place bait in runways, at feeding and watering areas, behind boards along walls, between walls, and behind gnawed openings.

**OUTDOORS:** Place bait in burrows, in sewers above high water line, and agricultural premises.

**FOR NORWAY AND ROOF RATS:** Place at least 4 to 16 ounces of bait per placement. Maintain constant supply of bait at stations for at least 10 days as long as there is evidence of rat population.

**FOR HOUSE MICE:** Place 1/4 - 1/2 oz. (tablespoon amounts) per placement with stations located at 8 to 12 ft. intervals. Maintain constant supply of bait for at least 15 days.

Contaminated or spoiled baits should be replaced promptly. Do not reuse empty container. Destroy when empty. Treated baits must be placed in locations not accessible to children, pets, wildlife and domestic animals, or in tamper-proof bait boxes. Do not allow baited bait to be used as mouse feed. Do not

IMPREGNATED  
RAT AND MOUSE  
KILLER

To insure the complete penetration of the bait by the toxicant, this product has been prepared in a two-step operation:

1. The active ingredient was dissolved in mineral oil to form a concentrate.

2. This mineral oil concentrate was then used to impregnate the bait.

This process provides the following advantages:

a. The mineral oil aids in the preservation of the bait, thus reducing the possibility of rancidity that may cause bait rejection.
