1. Add this last sentence under "READ THIS LABEL":

Apply only for the sites, pests, and application methods specified on this label.

You may delete this sentence at the end of the "USE RESTRICTIONS":

Do not apply this product by any method not specified on this label.

- Under "STORAGE AND DISPOSAL", revise "Container Disposal" to "Container Handling" followed by instructions for each type of container. In general, you will be adding the new text required by the "Container Regulations" (40 CFR 156.140 – .159) and explained in PRN 2007-4 to the existing container disposal instructions. Contact us if you need assistance in developing correct text. Also, all products distributed or sold in nonrefillable containers will need batch codes on the label or the container.
- 3. Follow Enclosure 2, "Minimum Type Sizes for Final Printed Label".

The acceptable Confidential Statement of Formula (CSF) for this product is dated February 21, 2000, provided that, <u>within 30 days</u> of receipt of this letter, you submit a revised CSF that reflects the current nominal concentration of your source material. All other versions are obsolete.

Stocks of product with existing labels may be used for eighteen (18) months.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed. If you have any questions, please contact Dan Peacock by phone (703-305-5407), or E-Mail (peacock.dan@epa.gov).

- Enclosures: 1. Stamped Label
 - 2. Minimum Type Sizes for Final Printed Label

Pesticide Telecommunications Network at 1-500-556-7378. USE RESTRICTIONS: Use to control Norway rats, roof rat: and house mice inside of homes, industrial and agricultura buildings, and similar man made structures. Tracking powde must be placed in locations not accessible to children, pets domestic animals or non-target wildlife. In agricultural building: where where livestock feeds are stored, or in commercial foor service, lood manufacturing or food processing establishments limit tractments to concealed inaccessible laces such as imit treatments to concealed, inaccessible places such as spaces betwen floors and walls. Do not apply tracking powde along walls, in corners or in open areas of rooms in which foor along waits, in conters of an open areas of noons in which noor or feed is handled or stored. Do not place tracking powder in areas where there is a possibility of contaminating water, food teedstuffs, lood or feed handling equipment, or milk or mea handling equipment, or surfaces that come in direct contac with food. Do not place near or inside ventilation duct openings with food. Do not place near or inside ventilation duct openings Do not apply this product in a way that will contact workers o other persons, either directly or through drit. Only protecte, handlers may be in the area during application. Keep all othe person cut of the treated area during application. Do not apply this poduct by any method not specified on this label. SELECTION OF TREATMENT AREAS: Determine dry areas where rats and mice will most likely pick up the powder on the feet or fur and ingest it during grooming. Generally, these areas are along walls, by gnawed openings and burrows, in corners and concealed places, in spaces between floors and walls, or i locations where rodents or their signs have been observed

and concealed places, in spaces between floors and walls, or in locations where rodents or their signs have been observed tracking powder may also be dusted into rat burrows that are located along the periphery of buildings and that are likely to serve as routes of entry into these structures. Remove good, piled directly on the floor and place on skids. Use boxes o other obstacles to lorce rodents to travel through constricter areas. Give special attention to the climbing ability of roof rats For this species, use suitable cardboard tubes or wooder tunnels securely attached to rafters or other horizontal surfaces where rats will pass. Employ tubes long enough to preven soillage of powder through the ends. spillage of powder through the ends.

Spinage of powder through the ends. APPLICATION DIRECTIONS: For mice, apply 1 ounce o tracking powder per 2.5 sq. ft. of runway area. For rats, apply 2 ounces of tracking powder per 2.5 sq. ft. of runway area. Apply with a hand bulb or similar duster - do not use power dusting devices. Sprinkle tracking powder in patches in a manner tha will expose it to rodents. Patch size may be (but not limited to 6 inches x 12 inches and should be adapted to each situation Maintain tracking powder in treated areas for at least 20 days. For burrows that are located along the periphery of buildings and that are likely to serve as routes of entry into these structures, place about 5 grams of tracking powder in each burrow with host-pump duster (about 15 pumps). Close burrows with soil, loose leaves or paper. Retreat if burrows are reopened.

Follow-up: Collect and dispose of all visible dead animals and leftover tracking powder properly. To discourage reinfestation limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment. For a continuous infestation, set up permanent tracking powder stations and replenish the powder as needed.
