EPA Registration No. 7173-187
Maki Rat & Mouse Bait Packs
EPA Registration No. 7173-188
Maki Paraffin Blocks
EPA Registration No. 7173-189
Your Letter of November 26, 1985

The amendment referred to above, submitted in connection with registration under FIFRA sec. 3(c)(7)(A) is acceptable provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Make the labeling changes listed below before you release the product for shipment bearing the amended labeling:
 - a. Delete "General Classification."
3. Submit five (5) copies of your final printed labeling before you release the product for shipment.

2

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

William H. Miller
Product Manager (16)
Insecticide-Rodenticide Branch
Registration Division (TS-767)

**DIRECT
GENERAL USE**

It is a violation of Federal law to use this product in a manner inconsistent with its label.

USE RESTRICTIONS

For control of Norway Rats and Mice: May be used in homes, industrial buildings, ships, trains, aircraft buildings. May also be used in barns, feed stores, etc.

Non-urban areas: May be used in agricultural buildings.

Treated baits must be placed in locations out of reach of domestic animals in areas where there is food or surfaces that

SELECTION OF TREATMENT

rats and/or mice will be present. Generally, these areas are in or beside burrows, in corners, floors and walls, or in locations where they have been observed. Remove

APPLICATION

Each MAKI Block consists of eight (8) pieces.

HOUSE MICE: Break apart at intervals of 8 to 12 feet per bait points of very high mouse activity. Supply of fresh bait for 10 days.

RATS: Break and place at intervals of 15 to 20 feet per bait points of uninterrupted supply of food. Supply of fresh bait for 10 days.

FOR BURROW APPLICATION:

Replace contaminated bait at intervals of 15 to 20 feet per bait points of uninterrupted supply of food. Supply of fresh bait for 10 days.
