Attention: Mr. Thomas Schmit

Subject: Generation Pellets Placepacks
EPA Reg. No. 7173-206
Generation Bait Dispenser
EPA Reg. No. 7173-210
Your amended applications of June 10 and 12, 2003

Purpose The purpose of these submissions under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) is to revise the labeling for each product.

Label The label submitted with the above letter, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) is acceptable, provided that you consider the following change and submit one (1) copy of final printed labeling, including graphics, to us before you release product for shipment. A copy of the stamped label is enclosed for your records.

1. As an alternative to putting the company telephone number on label, consider adding one of these two numbers on label where callers can receive treatment advice:
 - a. 1-800-222-1222 (National Poison Control Centers Hotline) or
 - b. 1-800-858-7378 (National Pesticide Information Center, NPIC).

Existing stocks Stocks of existing labels may be used for eighteen (18) months.

Consequence for non-compliance If these conditions are not complied with, the registrations will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Questions

If you have questions about this letter, please contact me at 703-305-5407 (by phone), 703-305-6596 (by fax), or peacock.dan@epa.gov (by E-Mail).

Sincerely yours,

Daniel B. Peacock, Biologist
Insecticide-Rodenticide Branch
Registration Division (7504C)

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals

CAUTION: Keep away from children, domestic animals and pets. May be harmful or fatal if swallowed or absorbed through the skin because it may reduce the clotting ability of blood and cause bleeding. Do not get in eyes, on skin or on clothing. Wash arms, hands and face with soap and water after applying and before eating and smoking.

FIRST AID: Have this label with you when obtaining treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

Note to Physician or Veterinarian: Contains dithialone, an anticoagulant. For humans or dogs that have ingested this product, or have obvious poisoning symptoms (bleeding) or lowered prothrombin times, give Vitamin K₁ by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and wildlife. Do not apply directly to water.

STORAGE AND DISPOSAL:

Storage: Store in original container in a dry place inaccessible to children and pets.

Disposal: If empty. Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

WARRANTY: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

NET WEIGHT: 1.5 ounces (42.5 g)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

THIS IS NOT A TAMPER-RESISTANT BAIT STATION. DO NOT USE THIS PRODUCT IN AREAS ACCESSIBLE TO CHILDREN, PETS, DOMESTIC ANIMALS OR NONTARGET WILDLIFE.

USE RESTRICTIONS: For indoor use only, for the control of house mice. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. **URBAN AREAS:** This bait dispenser may only be used in homes, industrial, commercial and public buildings. This product may also be used inside transport vehicles (ships, trains, aircraft) and inside related port or terminal buildings. Do not use this product in sewers or in any outdoor area.

NON-URBAN AREAS: In non-urban areas, this product may only be used inside of homes and agricultural buildings.

SELECTION OF TREATMENT AREAS: Determine areas where mice will most likely find and consume bait. Generally, these are along walls, by gnawed openings, in corners and concealed places, between floors or walls, or in locations where rodents or their signs have been seen. Remove as much alternative food as possible. Use only on dry surfaces.

SECURING BAIT DISPENSER: If you desire to anchor this bait dispenser to a smooth clean surface, remove the cover sheet from the tape anchor located on the underside of the unit. If you wish to anchor the bait dispenser to a surface which will not allow the tape anchor to adhere, you may remove the tape anchor and place the dispenser over a nail or other such post anchored in the surface and protruding above the surface approximately 1 inch in order to inhibit lateral movement of the unit by mice. For more secure anchorage, a nail may be driven through the center post of the bait dispenser and into a wood or similar surface. Place bait dispenser in locations as specified under **APPLICATION DIRECTIONS.**

APPLICATION DIRECTIONS: Secure or place bait dispensers at 8 to 12 foot intervals on level surfaces in locations where the labeling permits this product to be used. After a bait dispenser is placed for use, make the bait available to mice by holding the base of the unit with one hand and gently lifting and turning the top portion in a counterclockwise direction. Stop when resistance to further turning is encountered (after about one quarter of a revolution). Do not attempt to open the unit further. Do not open units except when they are placed ready for use. Close units before removing them for reuse or disposal. Replace units which are emptied by mice or if bait becomes spoiled. Collect and dispose of all dead animals and leftover bait properly. To discourage reinestation, limit sources of rodent food, water and harborage as much as possible. If reinestation occurs, repeat treatment.
