OFFICE OF
PREVENTION, PESTICIDES,
AND TOXIC SUBSTANCES

APR 15 2008

Rachel M. Callies
Liphatech, Inc.
3600 West Elm Street
Milwaukee, WI 53209

Dear Ms. Callies:

Subject: Submission of amended label to include sewer applications
Maki Mini Blocks
EPA Registration No. 7173-215
Your submission dated January 24, 2008

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, is acceptable. A stamped copy is enclosed for your records. Submit two copies of your final printed labeling before you release the product for shipment. If you have any questions, please Julie Chao at (703) 308-8735 or chao.julie@epa.gov.

Regards,

A handwritten signature in black ink, appearing to read "John Hebert", written over a large, stylized loop.

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals

CAUTION: Keep away from children, domestic animals and pets. If swallowed, this product reduces the clotting ability of blood and causes bleeding. Avoid contact with eyes, skin or clothing. Wash arms, hands and face with soap and water after applying and before eating and smoking.

FIRST AID

Have this label with you when obtaining treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin with plenty of cool water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

Note to Physician or Veterinarian: Contains bromadiolone, an anticoagulant. For humans or dogs that have ingested this product, or have obvious poisoning symptoms (bleeding) or prolonged prothrombin times, give Vitamin K₁ by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Storage: Store in original container in a cool, dry place inaccessible to children and pets.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Dispose of empty container in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

Alternate "Storage and Disposal" statement for packaging intended solely for household use:

STORAGE AND DISPOSAL:

This is a nonrefillable container.
Storage: Store in original container in a cool, dry place inaccessible to children and pets.
Disposal: If empty: Do not reuse or refill this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

Alternate warranty statements:

Satisfaction guaranteed or your money back.

Optional marketing statements:

Contains Bittering agent
Bitrex™ is a trademark of Macfarlan, Smith Ltd., Edinburgh, Scotland

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals, and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS: This product may only be used to control Norway rats, roof rats and house mice. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

Urban Areas: This product may be used in and around homes, industrial, commercial, agricultural and public building, food processing facilities and similar man-made structures. This product may also be used in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. This product may also be used in alleys.

Non-urban Areas: This product may only be used inside of homes and agricultural, industrial and commercial buildings.

Selection of Treatment Areas: Determine areas where rats and/or mice will most likely find and consume bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors or walls, or in locations where rodents or their signs have been seen. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:

(Qualifier statement for package containing 4 blocks:)

This package contains enough bait (4 oz.) to kill 1 to 3 rats.

(Qualifier statement for package containing 5 blocks:)

This package contains enough bait (5 oz.) to kill 1 to 4 rats.

(Qualifier statement for package containing 6 blocks:)

This package contains enough bait (6 oz.) to kill 2 to 6 rats.

(Qualifier statement for package containing 8 blocks:)

This package contains enough bait (8 oz.) to kill 2 to 7 rats.

(Qualifier statement for package containing 10 blocks:)

This package contains enough bait (10 oz.) to kill 3 to 9 rats.

(Qualifier statement for package containing 12 blocks:)

This package contains enough bait (12 oz.) to kill 3 to 12 rats.

Mice: Apply one block per placement. Two blocks may be needed at points of very high mouse activity. Space placements 8 to 12 feet apart. Maintain a constant supply of fresh bait for 15 days or until signs of mouse activity cease.

Rats: Apply 3 to 16 blocks per placement, usually spaced 15 to 30 feet apart. Maintain a constant supply of fresh bait for 10 days or until signs of rat activity cease.

For sewer applications, securely attach one end of a wire to bait block and the other end to a stationary structure such as the bottom step of manhole ladder or sewer grate, allowing just enough wire for bait to rest on a manhole bench. If no bench is present, suspend bait a few inches above the high water line, or place bait on a board supported by opposing steps of the ladder. Secure bait in this manner to minimize chance for removal by rats or water. Place at least 12 bait blocks per manhole.

Follow-up: Replace contaminated or spoiled bait immediately. Using gloves, collect and dispose of all visible dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed.
