

7173-218

8-28-2003

1/2

**PRECAUTIONARY STATEMENTS**  
 Hazard to Humans and Domestic Animals  
**CAUTION:** Keep away from children, domestic animals and pets. May be harmful or fatal if swallowed or absorbed through the skin because it may reduce the clotting ability of blood and cause bleeding. Do not get in eyes, on skin or on clothing. Wash arms, hands and face with soap and water after applying and before eating and smoking.

**FIRST AID**  
 Have this label with you when obtaining treatment advice.  
 If swallowed: Call a poison control center or doctor immediately for treatment advice.  
 If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.  
 If on skin or clothing: Take off contaminated clothing. Rinse skin with plenty of cool water for 15-20 minutes. Call a poison control center or doctor for treatment advice.  
 Note to Physician or Veterinarian: Contains difethialone, an anticoagulant. For humans or dogs that have ingested this product, or have obvious poisoning symptoms (bleeding) or lowered prothrombin times, give Vitamin K<sub>1</sub> by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish and wildlife. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

**STORAGE AND DISPOSAL**  
 Do not contaminate water, food or feed by storage or disposal.  
**Storage:** Store in original container in a cool, dry place inaccessible to children and pets.  
**Pesticide Disposal:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.  
**Container Disposal:** Dispose of empty container in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

**WARRANTY:** Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

 8.5 ounces (12 x 20 gram blocks)

AUG 28 2003  
 Under the Federal Insecticide,  
 Fungicide, and Rodenticide Act,  
 as amended, for the pesticide  
 registered under  
 EPA Reg. No. 7173-218

**DIRECTIONS FOR USE**  
 It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**READ THIS LABEL** and follow all use directions and precautions.

**IMPORTANT:** Do not expose children, pets or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals, and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, unused, spoiled, and unconsumed bait as specified on this label.

**USE RESTRICTIONS:** This product may be used to control Norway rats, roof rats and house mice at the Urban and Non-urban sites identified below. Do not place bait where it may contaminate food or surfaces that come in direct contact with food. Do not broadcast bait.

**Urban Areas:** This product may only be used in and around homes, industrial, commercial and public buildings; in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. Applications "around" buildings must be in tamper-resistant bait stations placed along the walls or other external parts of buildings (doorways, ramps, loading docks) where rats or mice might seek to gain entrance.

**Non-urban Areas:** This product may only be used inside of homes and agricultural buildings.

**SELECTION OF TREATMENT AREAS:** Determine areas where rats or mice are likely to find and consume bait, such as along walls, by gnawed openings, in corners and concealed places, between floors or walls, or locations where rodents or their signs are seen. Remove as much alternative food as possible.

**APPLICATION DIRECTIONS:**  
 (Qualifier statement for package containing 8 blocks only): This package contains enough bait (5.6 oz.) to kill one to four rats.  
 (Qualifier statement for package containing 10 blocks only): This package contains enough bait (7 oz.) to kill two to seven rats.  
 (Qualifier statement for package containing 12 blocks only): This package contains enough bait (8.5 oz.) to kill three to eight rats.

**Rats:** Apply 6 to 23 blocks per placement. Space placements at 15 to 30 foot intervals. Maintain an uninterrupted supply of fresh bait for 10 days or until signs of rat activity cease.

**Mice:** Apply one block per placement. Two blocks may be needed at points of extremely high mouse activity. Space placements at 8 to 12 foot intervals. Maintain an uninterrupted supply of fresh bait for 15 days or until signs of mouse activity cease.

**Follow-up:** Replace contaminated or spoiled bait immediately. Collect and dispose of all visible dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed.

"Mouse Only" wrapper label option: For retail sale as individual wrapped blocks. 2/2  
 Individual mini block wrap label:

**APPLICATION DIRECTIONS:** Generation Wrapped Mini Blocks should be placed with the wrapper on. Mice will chew through the wrapper to get the bait. Apply one block per placement. Space placements at 8 to 12 foot intervals. Two blocks may be placed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for 15 days or until fresh signs of mouse activity cease to appear. Replace contaminated or spoiled bait immediately. Collect and dispose of all viable dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed.

**STORAGE AND DISPOSAL:** Storage: Store in original container in a dry place inaccessible to children or pets. Disposal: If empty, do not reuse the container. Place in trash or offer for recycling if available. If partly filled, call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

**WARRANTY:** Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

**WRAPPED MINI BLOCKS**

**Precautionary Statements: Hazard to Humans & Domestic Animals**  
**CAUTION:** Keep away from children, domestic animals and pets. May be harmful or fatal if swallowed or absorbed through the skin because this material may reduce the clotting ability of blood and cause bleeding. Do not get in eyes, on skin or on clothing. Wash arms, hands and face with soap and water after applying and before eating and smoking.

**FIRST AID:** Have this label with you when obtaining treatment advice. If Swallowed: Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by the poison control center or doctor. Note to Physician or Veterinarian: If poisoning occurs, intramuscular and oral administration of Vitamin K<sub>1</sub> is antidotal as indicated in bishydroxycoumarin overdose. Repeated doses may be needed for up to two weeks (based on monitoring of prothrombin times). In severe cases, blood transfusions may be necessary.

**Environmental Hazards:** This product is toxic to fish and wildlife. Do not apply directly to water.

**WARRANTY:** Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**READ THIS LABEL:** Read this entire label and follow all use directions and use precautions.

**IMPORTANT:** Do not expose children, pets or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are filled, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, unused, spoiled, and unconsumed bait as specified on this label.

**USE RESTRICTIONS:** This product may be used to control Norway rats, roof rats and house mice at the Urban and Non-urban sites identified below. Do not place bait where it may contaminate food or surfaces that come in direct contact with food. Do not broadcast bait.

**Urban Areas:** This product may only be used in and around homes, industrial, commercial and public buildings; in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. Applications "around" buildings must be in tamper-resistant bait stations placed along the walls or other external parts of buildings (doorways, ramps, loading docks) where rats or mice might seek to gain entrance. Do not use this product in sewers.

**Non-urban Areas:** This product may only be used inside of homes and agricultural buildings.

**SELECTION OF TREATMENT AREAS:** Determine areas where mice will most likely find and consume bait. Generally, these are along walls, by creased openings, in corners and concealed places, between floors or walls, or in locations where signs have been seen. Remove as much alternative food as possible.

**APPLICATION DIRECTIONS:** Generation Wrapped Mini Blocks should be placed with the wrapper on. Mice will chew through the wrapper to get the bait. Apply one block per placement. Space placements at 8 to 12 foot intervals. Two blocks may be placed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for 15 days or until fresh signs of mouse activity cease to appear. Replace contaminated or spoiled bait immediately. Collect and dispose of all viable dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed.
