NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

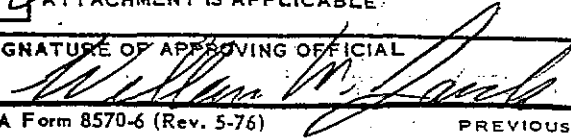

This product is conditionally registered in accordance with FIFRA sec. 3(c) (7) (A) provided that you:

- A. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c) (5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.
- B. Make labeling changes listed below and submit one (1) copy of final printed labeling before you release the product for shipment:
  1. Add "EPA Reg. No. 7173-222" to your label.
  2. Change the "APPLICATION DIRECTIONS:" for "MICE:" to read as indicated below.

MICE: Break each block to be used into four 1-oz. pieces. Use one 1-oz. per bait placement location. (Two 1-oz. pieces may be

needed at points of extremely high mouse activity.) Space placements at intervals of 8-12 feet. Maintain an uninterrupted supply of fresh bait for 15 days or until signs of mouse activity cease.

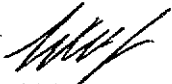

- 3. Change the first sentence of the "APPLICATION DIRECTIONS:" for "RATS:" to read

Apply one to four unbroken 4-oz. blocks at each placement location.

This registration will be subject to cancellation in accordance with FIFRA sec. 6(e) if you do not comply with these conditions. Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely yours,

William W. Jacobs, PhD

PRECAUTIONARY STATEMENTS  
HAZARD TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Keep away from humans, domestic animals and pets. May be harmful or fatal if swallowed or absorbed through the skin because this material may reduce the clotting ability of blood and cause bleeding.

Do not get in eyes, on skin or on clothing. Wash arms, hands, and face with soap and water after applying and before eating and smoking.

IF SWALLOWED CALL A PHYSICIAN AT ONCE.

NOTE TO PHYSICIAN: If ingested, administer Vitamin K<sub>1</sub> intramuscularly or orally as indicated in bishydroxycoumarin overdoses. Repeat as necessary based on monitoring of prothrombin times.

ENVIRONMENTAL HAZARDS

This product is toxic to mammals and birds. Do not apply this product directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL

STORAGE: Store in original container in a cool, dry place inaccessible to children and pets.

PESTICIDE DISPOSAL:

Commercial Use: Wastes resulting from the use of this product should be securely wrapped in several layers of newspaper and then disposed of onsite or at an approved waste disposal facility.

Household Use: Securely wrap wastes resulting from the use of this product in several layers of newspaper and discard in trash.

CONTAINER DISPOSAL:

Commercial Use: Dispose of empty container in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Household Use: Do not reuse empty container. Wrap container securely in several layers of newspaper and discard in trash.

KEEP AWAY FROM FOODSTUFFS

WARRANTY: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling contrary to label instructions.

## Rodenticide Block

Kills Norway Rats, Roof Rats, House Mice and Warfarin-Resistant Norway Rats

Norway Rats and House Mice May Consume a Lethal Dose in one Feeding with the First Dead Rodents Appearing Four or Five Days After Treatment Begins.

ACTIVE INGREDIENT:

*3-[3-(4'-bromo[1,1'-biphenyl]-4-yl)-3-hydroxy-1-phenylpropyl]4-hydroxy-2H-1-benzopyran-2-one.....	0.005%
Inert.....	
Ingredients.....	99.995%
Total:	100.000%

\*Bromadiolone-Supercald Patented in the U.S.A.

KEEP OUT OF REACH OF CHILDREN

### CAUTION

May be harmful or fatal if swallowed or absorbed through the skin. Do not get in eyes, on skin or on clothing. Wash arms, hands and face with soap and water after applying and before eating and smoking. If swallowed, call a physician at once. See left panel for additional precautionary statements.

MANUFACTURED BY:  
LiphaTech, Inc.  
West Custer Avenue  
Milwaukee, WI 53209

NET WEIGHT: 4 OUNCES

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS: For control of Norway Rats, Roof Rats, and House Mice.

URBAN AREAS: May be used in and around the periphery of homes, industrial, commercial and public buildings. This product may also be used in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. May also be used in alleys and in sewers.

NONURBAN AREAS: This product may be used inside homes and agricultural buildings.

Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats and/or mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain or snow. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:

Each Maki Rodenticide Block weighs 4 oz. and is scored to be broken into four 1 oz. pieces.

MICE: Break block and apply two 1 oz. piece per placement. Space placements at intervals of 8-12 feet. Maintain an uninterrupted supply of fresh bait for 15 days or until fresh sign of mouse activity ceases.

RATS: Apply four to sixteen 1 oz. pieces of block at each placement location. Space placements 15 to 30 feet apart in infested areas. Maintain an uninterrupted supply of fresh bait for 10 days or until fresh signs of rat activity cease to appear.

For burrow applications, insert two or four 1 oz. pieces of block deep into each active burrow. Check treated burrows each morning and evening to make sure that baits have not been pushed out of burrows.

For sewer applications, securely attach one end of a wire to a Maki Rodenticide Block and the other end to a stationary structure such as the bottom step of a manhole ladder or to a sewer grate, allowing just enough wire for the block to rest on manhole benching. If benching is not present, suspend bait block a few inches above the high water line or place block on a board supported by opposing steps of the ladder. Securing Maki Rodenticide Block in this manner will minimize chances for removal by rats or water. Place at least one bait block per manhole.

RATS/MICE: Replace contaminated or spoiled bait immediately. Collect and properly dispose of all dead animals and leftover bait, and any bait that has become accessible to nontarget animals. To prevent reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish bait as needed.

ACCEPTED  
with COMMENTS  
in EPA Letter dated  
DEC 31 1996  
Under the Federal Insecticide, Fungicide, and Rodenticide Act, no new data for this product are required under EPA Reg. No. 7173-222
