Attention: Mr. Thomas J. Schmit

Subject **Generation Block**
 EPA Reg. No. 7173-226
 Your amended application of July 29, 2005

Purpose This submission revises the Confidential Statement of Formula (CSF) and label for this product, under sec 3 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

CSF The Confidential Statement of Formula (CSFs) dated July 29, 2005, is acceptable. We have placed a copy in our files for this product. All previous versions are obsolete.

Labeling The labeling submitted with the above letter is acceptable, provided that you submit one (1) copy of final printed labeling to us, with the following changes, before you ship the product.

1. After "**For burrows**," change "one or two pieces" to "one. two ounce piece".

Labeling-continued

- 2. We cannot approve your "optional marketing statement", "One 2-ounce piece of bait block can kill up to 50 mice" because the data presented do not support it. You used an LD-50 value to calculate the claim. However, by definition, the LD-50 is the dosage expected to kill only half of the organisms exposed to it, not all of them. In addition, the projection also fails to take into account behavioral factors or the loss of bait material through various processes. Such factors would reduce the number of mice that two ounces of a 25-ppm Difethialone product reasonably could be expected to be able to kill.

Existing stocks Forms

Stocks of product with existing labels may be used for eighteen (18) months.

Consequence for non-compliance

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Questions

If you have questions about this letter, please contact me at 703-305-5407 (phone); 703-305-6596 (fax); or peacock.dan@epa.gov (E-Mail).

Sincerely,

Daniel B. Peacock, Biologist
Insecticide-Rodenticide Branch

PRECAUTIONARY STATEMENTS
Hazard to Humans and Domestic Animals

CAUTION: Keep away from children, domestic animals and pets. May be harmful if swallowed, because this product reduces the clotting ability of blood and causes bleeding. Avoid contact with eyes, skin or clothing. Wash arms, hands and face with soap and water after applying and before eating and smoking.

FIRST AID

Have this label with you when obtaining treatment advice. If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

Note to Physician or Veterinarian: Contains difethialone, an anticoagulant. For humans or pets that have ingested this product, or have obvious poisoning symptoms (bleeding) or prolonged prothrombin times, give Vitamin K₁ by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Storage: Store in original container in a cool, dry place inaccessible to children and pets.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Dispose of empty container in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

WARRANTY: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

Product No. Label No.

Alternate "Storage and Disposal" statement for packaging intended solely for household use:

STORAGE AND DISPOSAL

Storage: Store in original container in a dry place inaccessible to children and pets.

Disposal: If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

Alternate warranty statements:

Satisfaction guaranteed or your money back.

Optional marketing statements:

One 2-ounce piece of bait block can kill up to 50 mice

GENERATION BLOCK

**KILLS NORWAY RATS,
ROOF RATS, HOUSE MICE AND
WARFARIN-RESISTANT HOUSE MICE**

**NORWAY RATS AND HOUSE MICE CAN CONSUME A
LETHAL DOSE IN ONE NIGHT'S FEEDING
WITH FIRST DEAD RODENTS APPEARING
FOUR OR FIVE DAYS AFTER FEEDING BEGINS**

Active Ingredient: difethialone*	0.0025%
Inert Ingredients	99.9975%
Total	100.0000%

*Patented in the U.S.A.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals, and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooted livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS: This product may be used to control Norway rats, roof rats and house mice. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food.

Urban Areas: May be used indoors and in transport vehicles (ships, trains, aircraft). May be used outdoors within 15 feet of homes, food processing facilities, industrial, commercial, agricultural and public buildings, and similar manmade structures.

Non-urban Areas: This product may only be used inside of homes and agricultural buildings.

Selection of Treatment Areas: Determine areas where rats or mice will most likely find and consume bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors or walls, or in locations where rodents or their signs have been seen. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:

(Qualifier statement only for 12 ounce block.)

This package contains enough bait (12 oz.) to kill 3 to 12 rats.

Each bait block is scored to be broken into 2-oz. pieces.

Mice: Break block and apply one 2-oz. piece of block per placement. Space placements 8 to 12 feet apart. Maintain a constant supply of fresh bait for 15 days or until signs of mouse activity cease.

Rats: Apply two to eight 2-oz. pieces of block per placement, usually spaced 15 to 30 feet apart. Maintain a constant supply of fresh bait for 10 days or until fresh signs of rat activity cease.

For burrows, insert one or two pieces of block deep into each active burrow. Check treated burrows each morning and evening to make sure that bait has not been pushed out of burrows.

For sewer applications, securely attach one end of a wire to bait blocks and the other end to a stationary structure such as the bottom step of manhole ladder or to a sewer grate, allowing just enough wire for bait to rest on manhole benching. If benching is not present, suspend bait a few inches above the high water line or place bait on a board supported by opposing steps of the ladder. Securing bait in this manner will minimize chances for removal by rats or water. Place at least one entire bait block per manhole.

Follow-up: Replace contaminated or spoiled bait immediately. Collect and dispose of all visible dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed. (21205)
