

U.S. ENVIRONMENTAL PROTECTION AGENCY

Office of Pesticide Programs Registration Division (7505C) Ariel Rios Building 1200 Pennsylvania Ave, NW Washington, D.C. 20460

EPA Reg.	Date of Issuance:
Number:	

7173-228

November 9, 2004

Term of Issuance:

Conditional

Name of Pesticide Product:

Maki Green Paraffin Blocks

NOTICE OF PESTICIDE:

x RegistrationReregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Lipha Tech, Inc.

3600 West Elm Street Milwaukee, WI 53209

Attn: Mr. Thomas J. Schmit

Note: Changes in litheling differing in substance from that accepted in connection with this engineration must be submitted to and accepted by the Registration Physician prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named posticide is hereby registered/preregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a perticide in socordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7) provided that you:

- 1. Make the following label change(s) before you release the product for shipment:
 - a.. Add the following registration number: EPA Reg. No. 7173-228 to your label
 - b. In the USE RESTRICTIONS: statement under "NON-URBAN AREAS": modify the statement to read:

This product may only be used inside of homes and agricultural buildings.

2. Under the PRECAUTIONARY STATEMENTS, modify the statement to read: "Harmful if swallowed or absorbed through the skin because the material may reduce the clotting of ability of blood and cause bleeding. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. If bait is handled wear gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Users should remove clothing immediately if pesticide gets inside, then wash thoroughly and put on clean clothing."

Label Acceptance

- 3. Under PRECAUTIONARY STATEMENTS, in the First Aid statement, after "If swallowed", add the following: "Have person sip a glass of water if able to swallow" and "Do not induce vomiting unless told to do so by the poison control center or doctor." Or since the product toxicity is category IV by the oral route of exposure, you may delete the "If swallowed" statement completely.
- 4. Under PRECAUTIONARY STATEMENTS, in the First Aid section, it is recommended that separate "Note to Physician" and "Note to Veterinarian" text be placed on the labels.

The "Note to Physician" section should read:

"This product may reduce the clotting ability of the blood and cause hemorrhaging. If poisoning symptoms occur, intramuscular and oral administration of Vitamin K1 may be needed. For human cases, Vitamin K1 is antidotal at 5-10 mg (not mg/kg) for children and 10-20 mg for adults. Repeated doses may be needed (based on monitoring of prothrombin times)."

Label Acceptance (Continued)

The "Note to Veterinarian" section should be revised as specified and placed within a box:

"TREATMENT FOR PET POISONINGS

If pet or animal eats bait, call a veterinarian or Hotline Number (1-800-301-7976) at once.

NOTE TO VETERINARIAN

This product contains bromadiolone, an anticoagulant. For animals ingesting (or suspected of ingesting) bait, and /or having obvious poisoning symptoms, such as bleeding or lowered prothrombin times, give Vitamin K1 at 2-5 mg/kg. Repeated doses may be needed for up to 30 days (based on monitoring of prothrombin times). It may necessary to check prothrombin times every 3 days until values return to normal. In severe cases, blood transfusions may be necessary.

5. Under **PRECAUTIONARY STATEMENTS**, in the "Environmental Hazards" section, revise the statement to read:

This product is toxic to fish and wildlife. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark."

- 6. Submit one (1) copy of the revised final printed label for the record before you release the product for shipment. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6 (e). Your release for shipment of the product constitutes acceptance of these conditions.
- 7. A copy of the label stamped "Accepted with Comments" is enclosed for your records.

Questions:

If you have any questions or comments about this letter, please contact me at 703-605-0716 (by phone), 703-305-6596 (by fax), or mccann.geri@epa.gov (by E-Mail).

Sincerely

Geraldine R. McCann

12 ounces (340 g) ACCEPTED

with COMMENTS In EPA Letter Dated

NOV 9 2004 Under the Federal Insecticide. Fungicide, and Rodenticide Act. as amended, for the pesticide registered under EPA Reg. No. 7/73-228

DIRECTIONS FOR USE It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL and follow all use directions and use

precautions.

MEPORTANT: Do not expose children, pets or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.

2. Apply belt in locations out of reach of children, pets, domestic animals and nontarget wildfife, or in temper-resistant belt stations. These stations must be resistant to destruction by dogs and children under sty years of age, and must be used in a manner that prevents such children from reaching into belt compariments and obtaining belt. If belt can be shaken from stations when they are litted, units must be secured or otherwise immobilized, even stronger pat stations are needed in areas open to hooled investock, raccoons, bears, other potentially destructive arimals, or in areas prone to variatism.

3. Dispose of product container, unused, spoiled, and unconsumed bat as specified on this label.

unconsumed bat as specified on this label.

USERESTRICTIONS: This product may be used to control Norway rats, noof rats and house mice. Do not place bat in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

Urban areas: This product may be used in and eround homes food processing lacifilities, indiustrial, commercial and public buildings in transport verticles (ships, trains, aircraft) and in and around related port or terminal buildings. This product may also be used in alleys and sewers.

Non-urban areas: This product may be used inside of homes and acround that buildings.

and agricultural buildings

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume ball. Generally, these are along walls, by gnaved openings, in obeside burrows, in corners and concealed places, between floors or walls, or in locations where rodents or their signs have been seen. Remove as much alternative food as possible.

APPLICATION DRECTIONS:
Each block is scored to be broken into eight 2-oz.pieces.
Milica: Breek block and apply one 2-oz.piece per placement.
Space placements 8 to 12 lest apart. Maintain a constant
supply of fresh belt for 15 days or until fresh signs of mouse

supply of fresh bast for 15 days or untail fresh signs of mouse activity cease.

Raiss: Apply two to eight 2-oz.pieces of block (or one enter block) per placement. Space pracements 15 to 30 feet apart.

Maintain a constant supply of fresh bast for 10 days or unbil fresh signs of rat activity cease.

For burrow applications, insert one or two 2-oz.pieces of block deep into each active burrow. Check treated burrows each morning and evening to make sure that batk has not been pushed out of burrows.

pushed cut of burrows.
For sewer applications, securely attach one end of a wire to beat block and the other end to a stationary structura such as the bottom step of manhole ledder or sewer grate, allowing just enough wire for bait to rest on a manhole bench. If no bench is present, suspend beit a lew inches above the high water line, or place bait on a board supported by opposing steps of the ladder. Secure beit in this manner to minimize chance for removal by rats or water. Place at least one entire ball block per manhole.

manhole.

Follow-up: Replace contaminated or spoiled balt immediately. Collect and dispose of all visible dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodern lood, water and harborage as much as possible. If reinfestation occurs, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish belt as needed.
