PRECAUTIONARY STATEMENTS
Hazard to Humans and Domestic Animals

CAUTION: Keep away from children, domestic animals and pets. May be harmful if swallowed or absorbed through the skin because it may reduce the clotting ability of blood and cause bleeding. Do not get in eyes, on skin or on clothing. Wash arms, hands and face with soap and water after applying and before eating and smoking.

FIRST AID
Have this label with you when obtaining treatment advice. If swallowed: Call a poison control center or doctor immediately for treatment advice. If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. If on skin or clothing: Take off contaminated clothing. Rinse skin with plenty of cool water for 15-20 minutes. Call a poison control center or doctor for treatment advice. Note to Physician or Veterinarian: If ingested, administer Vitamin K₁ intramuscularly or orally as indicated in bishydroxycoumarin overdose. Repeat as necessary based on monitoring of prothrombin times.

Environmental Hazards: This product is toxic to fish and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal. Storage: Store in original container in a cool, dry place inaccessible to children and pets. Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Container Disposal: Dispose of empty container in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

WARRANTY: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

Net Weight:
4 ounces (4 x 1 ounce blocks)
5 ounces (5 x 1 ounce blocks)
6 ounces (6 x 1 ounce blocks)
8 ounces (8 x 1 ounce blocks)
10 ounces (10 x 1 ounce blocks)
12 ounces (12 x 1 ounce blocks)
or bulk package containing
1 pound up to 50 pounds

**ACCEPTED
with COMMENTS
in EPA Letter Dated:**

FEB - 9 2005

Optional marketing statement for use on individually-wrapped blocks:
Under the Fungicide, and Rodenticide Act as amended, EACH BAIT BLOCK IS INDIVIDUALLY WRAPPED registered under EPA Reg. No. 7173-232
NO NEED TO TOUCH THE BAIT!

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS: This product may be used to control Norway rats, roof rats and house mice. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

Urban areas: This product may be used in and around homes, food processing facilities, industrial, commercial and public buildings; in transport vehicles (ships, trains, aircraft) and around related port or terminal buildings. This product may also be used in alleys. Do not use in sewers.

Non-urban areas: This product may only be used inside of homes and agricultural buildings.

SELECTION OF TREATMENT AREAS: Determine areas where rats or mice will most likely find and consume bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors or walls, or in locations where rodents or their signs have been seen. Remove as much alternative food as possible.

- APPLICATION DIRECTIONS:**
- (Qualifier statement only for package containing 4 blocks.) This package contains enough bait (4 oz.) to kill 1 to 3 rats.
 - (Qualifier statement only for package containing 5 blocks.) This package contains enough bait (5 oz.) to kill 1 to 4 rats.
 - (Qualifier statement only for package containing 6 blocks.) This package contains enough bait (6 oz.) to kill 2 to 6 rats.
 - (Qualifier statement only for package containing 8 blocks.) This package contains enough bait (8 oz.) to kill 2 to 7 rats.
 - (Qualifier statement only for package containing 10 blocks.) This package contains enough bait (10 oz.) to kill 3 to 9 rats.
 - (Qualifier statement only for package containing 12 blocks.) This package contains enough bait (12 oz.) to kill 3 to 12 rats.
 - (Qualifier statement for use only when blocks are individually wrapped.) Bait blocks should be placed with the wrapper on. Mice and rats will chew through the wrapper to get the bait.

Mice: Apply one block per placement. 2 blocks may be needed at points of high mouse activity. Space placements 8 to 12 feet apart. Two blocks may be needed at points of very high mouse activity. Maintain a constant supply of fresh bait for 15 days or until fresh signs of mouse activity cease.

Rats: Apply 3 to 16 blocks per placement. Space placements 15 to 30 feet apart. Maintain a constant supply of fresh bait for 10 days or until fresh signs of rat activity cease.

For burrows: insert one or two blocks deep into each active burrow. Check treated burrows each morning and evening to make sure that bait has not been pushed out of burrows.

Follow-up: Replace contaminated or spoiled bait immediately. Collect and dispose of all visible dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed (22504)

"Full label" wrapper label option: For retail sale in outer packages containing 4, 5, 6, 8, 10 or 12 individual blocks, or bulk packaging from 1 pound up to 50 pounds, with size-specific qualifier statements on outer label.
