Subject: Minor Label Changes in Compliance with PR Notice 98-10

EPA Reg. No. 7173-236
Application Dated May 11, 2009

Dear Ms. Callies:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 dated May 11, 2009 for the above product. The Registration Division (RD) has conducted a preliminary screen of this request for its applicability under PRN 98-10 and finds that the action (s) requested fall with the scope of PRN 98-10. The submitted label and application has been stamped "Notification" and will be placed in our records.

If you have any questions, call me at 703 305-5409 or electronically at daniel.dani@epa.gov

Sincerely,

/s/

Dani Daniel
Registration Division (7505P)

Re: Notification of Minor Label Changes for
Difethialone Mini Blocks, EPA Reg. No. 7173-236

Dear Mr. Hebert,

Enclosed is a notification of Minor Label Changes per PR Notice 98-10. As you can see by the enclosed labels, the only changes are additions to the marketing statements highlighted on pages 23 and 24.

Please contact me if you have any questions regarding this submission.

Sincerely,

A handwritten signature in cursive script, reading "Rachel M. Callies".

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals

CAUTION: Keep away from children, domestic animals and pets. May be harmful if swallowed or absorbed through the skin because it may reduce the clotting ability of blood and cause bleeding. Avoid contact with eyes, skin or clothing. Wash arms, hands and face with soap and water after applying and before eating and smoking.

FIRST AID

Have this label with you when obtaining treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

Note to Physician or Veterinarian: Contains difethialone, an anticoagulant. For humans or dogs that have ingested this product, or have obvious poisoning symptoms (bleeding) or lowered prothrombin times, give Vitamin K₁ by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. This is a nonrefillable container.

Storage: Store in original container in a cool, dry place inaccessible to children and pets.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Do not reuse or refill this container. Offer for recycling if available or dispose of empty container in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

6/27

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **READ THIS LABEL** and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets or other nontarget animals to rodenticides. To help prevent accidents: 1. Store product not in use in a location out of reach of children and pets. 2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism. 3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS: This product may only be used to control Norway rats, roof rats and house mice. Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment. Do not broadcast bait.

Urban Areas: This product may be used in and around homes, industrial, commercial, agricultural and public buildings, food processing facilities and similar man-made structures. May also be used in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. This product may also be used in alleys.

Non-urban areas: This product may only be used inside of homes and agricultural, industrial and commercial buildings.

Selection of Treatment Areas: Determine areas where rats or mice will most likely find and consume bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors or walls, or in locations where rodents or their signs have been seen. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:

Qualifier statement for 6 count package: This package contains enough bait (4.2 oz.) to kill 1 to 3 rats.

Qualifier statement for 8 count package: This package contains enough bait (5.6 oz.) to kill 2 to 5 rats.

Qualifier statement for 9 count package: This package contains enough bait (6.3 oz.) to kill 2 to 6 rats.

Qualifier statement for 10 count package: This package contains enough bait (7.0 oz.) to kill 2 to 7 rats.

Qualifier statement for 12 count package: This package contains enough bait (8.4 oz.) to kill 3 to 8 rats.

Qualifier statement for 14 count package: This package contains enough bait (9.8 oz.) to kill 3 to 10 rats.

Qualifier statement for 16 count package: This package contains enough bait (11.2 oz.) to kill 3 to 12 rats.

Mice: Apply one block per placement. Two blocks may be needed at points of very high mouse activity. Space placements 8 to 12 feet apart. Maintain a constant supply of fresh bait for 15 days or until signs of mouse activity cease.

Rats: Apply six to twenty-three blocks per placement, usually spaced 15 to 30 feet apart. Maintain a constant supply of fresh bait for 10 days or until signs of rat activity cease.

For sewer applications, securely attach one end of a wire to bait blocks and the other end to a stationary structure such as the bottom step of manhole ladder or to a sewer grate, allowing just enough wire for bait to rest on manhole benching. If benching is not present, suspend bait a few inches above the high water line or place bait on a board supported by opposing steps of the ladder. Securing bait in this manner will minimize chances for removal by rats or water. Place at least 23 bait blocks per manhole.

7/27

Follow-up: Replace contaminated or spoiled bait immediately. Wearing gloves, collect and dispose of all visible dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed.

EPA Reg. No. 7173-236

EPA Est. No. 7173-WI-1

For humans or dogs that have ingested this product, or have obvious poisoning symptoms (bleeding) or lowered prothrombin times, give Vitamin K₁ by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

Net Weight: 0.7 ounces (20 grams)

18/27

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **READ THIS LABEL** and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets or other nontarget animals to rodenticides.

To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS:

This product may only be used to control house mice. Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment. Do not broadcast bait.

Urban Areas: This product may be used in and around homes, industrial, commercial, agricultural and public buildings, food processing facilities and similar man-made structures. May also be used in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. This product may also be used in alleys.

Non-urban areas: This product may only be used inside of homes and agricultural, industrial and commercial buildings.

Selection of Treatment Areas: Determine areas where mice will most likely find and consume bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors or walls, or in locations where rodents or their signs have been seen. Remove as much alternative food as possible.

APPLICATION DIRECTIONS: Apply one block per placement. Two blocks may be needed at points of very high mouse activity. Space placements 8 to 12 feet apart. Maintain a constant supply of fresh bait for 15 days or until signs of mouse activity cease.

Follow-up: Replace contaminated or spoiled bait immediately. Wearing gloves, collect and dispose of all visible dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. This is a nonrefillable container.

Storage: Store in original container in a cool, dry place inaccessible to children and pets.

Disposal: Do not reuse or refill this container. Offer for recycling if available or dispose of empty container in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals

CAUTION: Keep away from children, domestic animals and pets. May be harmful if swallowed or absorbed through the skin because it may reduce the clotting ability of blood and cause bleeding. Avoid contact with eyes, skin or clothing. Wash arms, hands and face with soap and water after applying and before eating and smoking.

FIRST AID

Have this label with you when obtaining treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice.

Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes.

Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

Note to Physician or Veterinarian: Contains difethialone, an anticoagulant. For humans or dogs that have ingested this product, or have obvious poisoning symptoms (bleeding) or lowered prothrombin times, give Vitamin K₁ by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

STORAGE AND DISPOSAL

This is a nonrefillable container. Storage: Store in original container in a cool, dry place inaccessible to children and pets. Disposal: If empty: Do not reuse or refill this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

21/27

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets or other nontarget animals to rodenticides. To help prevent accidents: 1. Store product not in use in a location out of reach of children and pets. 2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism. 3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS: This product may only be used to control Norway rats, roof rats and house mice. Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment. Do not broadcast bait. **Do not use this product in areas accessible to children, pets, domestic animals or nontarget wildlife. Do not use this product outdoors.** This product may only be used inside of homes and agricultural, industrial and commercial buildings.

Selection of Treatment Areas: Determine areas where rats or mice will most likely find and consume bait. Generally, these are along walls, by gnawed openings, in corners and concealed places, between floors or walls, or in locations where rodents or their signs have been seen. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:

Qualifier statement for 6 count package: This package contains enough bait (4.2 oz.) to kill 1 to 3 rats.

Qualifier statement for 8 count package: This package contains enough bait (5.6 oz.) to kill 2 to 5 rats.

Qualifier statement for 9 count package: This package contains enough bait (6.3 oz.) to kill 2 to 6 rats.

Qualifier statement for 10 count package: This package contains enough bait (7.0 oz.) to kill 2 to 7 rats.

Qualifier statement for 12 count package: This package contains enough bait (8.4 oz.) to kill 3 to 8 rats.

Qualifier statement for 14 count package: This package contains enough bait (9.8 oz.) to kill 3 to 10 rats.

Qualifier statement for 16 count package: This package contains enough bait (11.2 oz.) to kill 3 to 12 rats.

Mice: Apply one block per placement. Two blocks may be needed at points of very high mouse activity. Space placements 8 to 12 feet apart. Maintain a constant supply of fresh bait for 15 days or until signs of mouse activity cease. **Rats:** Apply six to twenty-three blocks per placement, usually spaced 15 to 30 feet apart. Maintain a constant supply of fresh bait for 10 days or until signs of rat activity cease. **Follow-up:** Replace contaminated or spoiled bait immediately. Wearing gloves, collect and dispose of all visible dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed.

APPLICATION DIRECTIONS:

Qualifier statement for 6 count package: This package contains enough bait (4.2 oz.) to kill 1 to 3 rats.

Qualifier statement for 8 count package: This package contains enough bait (5.6 oz.) to kill 2 to 5 rats.

Qualifier statement for 9 count package: This package contains enough bait (6.3 oz.) to kill 2 to 6 rats.

Qualifier statement for 10 count package: This package contains enough bait (7.0 oz.) to kill 2 to 7 rats.

Qualifier statement for 12 count package: This package contains enough bait (8.4 oz.) to kill 3 to 8 rats.

Qualifier statement for 14 count package: This package contains enough bait (9.8 oz.) to kill 3 to 10 rats.

Qualifier statement for 16 count package: This package contains enough bait (11.2 oz.) to kill 3 to 12 rats.

1. Clean up: Eliminate possible rodent food sources. Store food in sealed containers and sweep up food spills.

2. Select Areas for Placement: Focus on areas where rodents have been active - generally along walls, between floors or wall, inside cabinets, under appliances, in basements, attics or garages. Be sure to place out of reach of children and pets.

3. Place Blocks: For mice apply 1 block per placement, usually spaced 8 to 12 feet apart. For rats apply 6 to 23 blocks per placement, usually spaced 15 to 30 feet apart.

4. Dispose: Maintain a constant supply of fresh bait for 15 days for mice and 10 days for rats, or until signs of activity has stopped. When rodents are eliminated, wear gloves to collect and dispose of all visible dead animals and remaining bait.

5. Prevent: To prevent another infestation, limit sources of rodent food and water as much as possible.
