JUL 27 2012

Dear Ms Brunlinger

Subject Label Revisions to Reflect New Label Perimeter Restriction of 100 Feet
and Burrow Baiting Language
Rozol Mini Blocks
EPA Registration No 7173-243

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable. A stamped copy is enclosed for your records. Please submit one (1) final printed copy for the above mentioned label before releasing the product for shipment.

Note Should you wish to add a reference to the company's website on your label please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) lists examples of statements EPA may consider false or misleading. In addition, **regardless of whether a website is referenced on your product's label**, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

If these conditions are not complied with the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions. If you have questions about this letter, please contact Jennifer Games at (703) 305-5967 or via e-mail at gaines_jennifer@epa.gov

Sincerely yours,

A handwritten signature in black ink, appearing to read "John Hebert".

PRECAUTIONARY STATEMENTS
Hazard to Humans and Domestic Animals

CAUTION Harmful if swallowed, absorbed through the skin, or if inhaled. Avoid contact with eyes, skin or clothing. Avoid breathing dust. Keep away from children, domestic animals and pets. All handlers (including applicators) must wear long sleeved shirt, long pants, shoes, socks, and waterproof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

User Safety Requirements Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet, and change into clean clothing.

FIRST AID Have this label with you when obtaining treatment advice.

If swallowed Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor.

If in eyes Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor immediately for treatment advice.

If on skin or clothing Take off contaminated clothing. Rinse skin with plenty of cool water for 15-20 minutes. Call a poison control center or doctor immediately for treatment advice.

If inhaled Move person to fresh air. If person is not breathing, call an ambulance, then give artificial respiration, preferably mouth to mouth, if possible. Call a poison control center or doctor immediately for treatment advice.

TREATMENT FOR PET POISONING If animal eats bait, call veterinarian at once.

NOTE TO PHYSICIAN OR VETERINARIAN Contains the anticoagulant chlorophacinone. If swallowed, this material may reduce the clotting ability of blood and cause bleeding. For humans or animals ingesting bait and/or showing obvious poisoning symptoms (bleeding or prolonged prothrombin times), give Vitamin K₁ intramuscularly or orally.

ENVIRONMENTAL HAZARDS This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water or rinsate.

STORAGE AND DISPOSAL Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage Store in original container in a cool, dry place inaccessible to children and pets.

Pesticide Disposal Wastes resulting from the use of this product may be disposed of in trash or at an approved waste disposal facility.

Container Handling Nonrefillable container. Do not reuse or refill this container. **[Plastic]** Completely empty container, then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill. **[Paper]** Completely empty container, then dispose of empty container in trash or at an approved waste disposal facility.

WARRANTY To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling

READ THIS LABEL and follow all use directions and precautions Use only for the sites, pests, and application methods described on this label

IMPORTANT Do not expose children, pets or other nontarget animals to rodenticides To help prevent accidents

- 1 Store product not in use in a location out of reach of children and pets
- 2 Apply bait in locations out of reach of children pets, domestic animals, and nontarget wildlife, or in tamper resistant bait stations These stations must be resistant to destruction by dogs and children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized Even stronger bait stations are needed in areas open to hoofed livestock raccoons, bears, other potentially destructive animals, or in areas prone to vandalism

- 3 Dispose of product container unused, spoiled, and unconsumed bait as specified on this label

Note Bait stations are mandatory for outdoor, above ground use Tamper resistant bait stations must be used if children, pets, non target mammals or birds may access the bait

USE RESTRICTIONS This product can only be used to control Norway rats, roof rats and house mice in and within 100 feet of man made structures constructed in a manner so as to vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, trash receptacles, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and port or terminal buildings, and related structures around and associated with these sites Fence and perimeter baiting beyond 100 feet from a structure, as defined above, is prohibited Do not sell this product in individual containers holding less than 4 pounds of bait Do not place near or inside ventilation duct openings Do not contaminate water food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment Do not apply directly to food or feed crops Do not broadcast bait Burrow baiting with this product is prohibited

Selection of Treatment Areas Determine areas where rats and/or house mice will most likely find and consume bait Generally, these are along walls, by gnawed openings, in corners and concealed places, between floors or walls, beside burrows or in locations where rats and/or house mice or their signs have been observed Remove as much alternative food as possible

APPLICATION DIRECTIONS

House Mice Apply 1 block per placement, usually spaced 8 to 12 feet apart Up to 2 blocks may be needed at points of very high house mouse activity Maintain a constant supply of fresh bait for 15 days or until signs of house mouse activity cease

Rats Apply 3 to 16 blocks per placement, usually spaced 15 to 30 feet apart Maintain a constant supply of fresh bait for 10 days or until signs of rat activity cease

For sewer applications, securely attach one end of a wire to bait block and the other end to a stationary structure such as the bottom step of manhole ladder or to a sewer grate, allowing just enough wire for bait to rest on manhole benching If benching is not present, suspend bait a few inches above the high water line or place bait on a board supported by opposing steps of the ladder Securing bait in this manner will minimize chance for removal by rats or water Place at least 16 blocks per manhole

Follow up Replace contaminated or spoiled bait immediately Wearing waterproof gloves, collect and dispose of all visible dead animals and leftover bait, as well as any bait that has become accessible to non target animals To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible If reinfestation does occur, repeat treatment For a continuous infestation, set up permanent bait stations and replenish bait as needed
