PRECAUTIONARY STATEMENTS
 Hazard to Humans and Domestic Animals

CAUTION: Keep away from humans, domestic animals and pets. Harmful if swallowed or absorbed through the skin because the material may reduce the clotting ability of the blood and cause bleeding. Avoid contact with skin, eyes or clothing. Wear shirt and long pants, shoes and socks, and chemical-resistant (such as waterproof) gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco. Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

USER SAFETY REQUIREMENTS: Follow manufacturer's instructions for cleaning/maintaining personal protective equipment (PPE). If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

FIRST AID: Have this label with you when obtaining treatment advice. If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor.

If on skin or clothing: Take off contaminated clothing. Rinse skin with plenty of cool water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

Note to Physician: This product may reduce the clotting ability of blood and cause hemorrhaging. If poisoning symptoms occur, intramuscular and oral administration of Vitamin K₁ may be needed. For human cases, Vitamin K₁ is antidotal at 5-10 mg (not mg/kg) for children and 10-20 mg for adults. Repeated doses may be needed (based on monitoring of prothrombin times).

Note to Veterinarian: This product contains chlorophacinone, an anticoagulant. For animals ingesting (or suspected of ingesting) bait, and/or having obvious poisoning symptoms, such as bleeding or prolonged prothrombin times, give Vitamin K₁ at 2-5 mg/kg. Repeated doses may be needed for up to 30 days based on monitoring of prothrombin times. It may be necessary to check prothrombin times every 3 days until values return to normal. In severe cases, blood transfusions may be necessary.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and wildlife. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of wastes. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Storage: Store in original container in a cool, dry place inaccessible to children and pets.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Dispose of empty container in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

RESTRICTED USE PESTICIDE
DUE TO HAZARD TO NONTARGET ORGANISMS
 For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's Certification.

POCKET GOPHER BAIT II

FOR THE CONTROL OF POCKET GOPHERS

Active Ingredient: chlorophacinone 0.005%
 Inert Ingredients 99.995%
 Total 100.000%

EPA Reg. No. 7173- Product No.
 EPA Est. No. 7173-WI-1 Label No.

KEEP OUT OF REACH OF CHILDREN
CAUTION: See side panel for additional precautionary statements.

LIPHA TECH 3600 W. Elm Street
 Milwaukee, WI 53209
 (414) 351-1476

NET WEIGHT: **ACCEPTED**
 1 pound up to 50 pounds

MAR 2 2005
 Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 7173-244

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product by any method not specified on this label. Rozol Pocket Gopher Bait is recommended for use on lawns, golf courses, range land, and non-crop areas. **FOR USE IN SUBSOIL ONLY.**

ENDANGERED SPECIES CONSIDERATIONS: NOTICE: The killing of a member of an endangered species during baiting operations may result in a fine under the Endangered Species Act. Do not use this product within prairie dog towns in the range of the black-footed ferret without first contacting endangered species specialists. U.S. Fish and Wildlife Service, Denver Regional Office. This pesticide should not be used within one mile of active dens of the San Joaquin Kit Fox in the following California counties: Kern, Kings, Fresno, San Luis Obispo, Merced, Monterey, Santa Barbara, Ventura, Tulare, and San Benito. Prior to use, contact endangered species specialists at the California Department of Fish and Game or the U.S. Fish and Wildlife Service, Portland Regional Office for recommendations.

Hand baiting: Burrowing pocket gophers (*Thomomys* sp. and *Geomys* sp.) throw out low, fan-shaped mounds on either side of their underground tunnel. These lateral tunnels coming to the surface are on the flat side of the fan and these holes plugged with loose soil. Consult Federal and State rodent control bulletins for a full discussion of pocket gopher burrowing habits.

Apply the bait in one or both of the following ways:

1. With a long-handled tablespoon, carefully remove the plug on the flat side of the fan. Carefully insert 1/2 cup of bait as far down into the hole as possible. Reclose opening, being careful not to cover the bait with soil.
2. Using a metal rod, probe 6-12 inches deep to locate the main tunnel. Consult diagram below for location to probe. Drop 1/2 cup of bait into the tunnel and cover the hole so light will not enter the tunnel system. Make 2-3 treatments per burrow system. Using gloves, bury dead animals and spilled bait found on soil surface immediately. Maintain a constant supply of bait in the burrow system for as long as there is gopher activity. Do not apply bait on surface of soil.

The right and the wrong ways to use a probe for poisoning gophers are shown above. Be sure that bait is in the main runway - not in the laterals or imbedded in the bottom of the runway.

Machine application using "burrow builder" equipment: Follow manufacturer's instructions for the equipment used to apply this bait. Make artificial burrows at the same depth as natural burrows, about 20 to 30 feet apart. Apply 6 to 8 pounds of bait per acre. Apply when soil conditions allow formation of good artificial burrows. Spilled bait must be collected for proper disposal.

WARRANTY: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when soil use or handling is contrary to label instructions.
