U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Registration Division (7505C)
1200 Pennsylvania Ave., N.W.
Washington, D.C. 20460

EPA Reg. Number:

7173-245

Date of Issuance:

December 29,
2005

NOTICE OF PESTICIDE:

Registration
 Reregistration
(under FIFRA, as amended)

Term of Issuance:

Conditional

Name of Pesticide Product:

Maki Bait Station

Name and Address of Registrant (include ZIP Code):

LiphaTech, Inc.
3600 W. Elm Street
Milwaukee, WI 53209

Attention: Mr. Thomas J. Schmit

R 31 / 18 5-227554

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you submit one (1) copy of final printed labeling to us, with the following changes, before you release the product for shipment.

1. Delete the word "readily" from the optional marketing claim, "MICE READILY ENTER AND FEED INSIDE" as we have no supporting data to evaluate how quickly mice will enter the unit.
2. Delete the optional marketing claim, "BAIT STATION LOCKS BAIT INSIDE!" as the bait station has no lock and is not "tamper-resistant".
3. Under "USE RESTRICTIONS", add "only" to "buildings" in 4th sentence.

Daniel B. Peacock, Biologist
Insecticide-Rodenticide Branch
Registration Division (7505C)

Date:

December 29, 2005

8/3

If this condition is not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of this condition.

A stamped copy of the label is enclosed. If you have any questions, please contact Dan Peacock by phone (703-305-5407), fax (703-305-6596), or E-Mail (peacock.dan@epa.gov).

- Enclosures: 1. Stamped Label
2. Minimum Type Sizes for Final Printed Label

maki
BAIT STATION
KILLS MICE! FOR INDOOR USE ONLY

Active Ingredient: bromadiolone	0.005%
Inert Ingredients	99.995%
Total	100.000%

KEEP OUT OF REACH OF CHILDREN
CAUTION: See back panel for additional precautionary statements.
Net Weight: 1 oz (28 grams)

(Top Side panel)

(Bottom Face panel)

PRECAUTIONARY STATEMENTS: Hazard to Humans and Domestic Animals
CAUTION: Keep away from children, domestic animals and pets. May be harmful if swallowed or absorbed through the skin because it may reduce the clotting ability of blood and cause bleeding. Do not get in eyes, on skin or on clothing. Wash arms, hands and face with soap and water after applying and before eating and smoking.
FIRST AID: Have this label with you when obtaining treatment advice.
If swallowed: Call a poison control center or doctor immediately for treatment advice.
If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
If on skin or clothing: Take off contaminated clothing. Rinse skin with plenty of cool water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
Note to Physician or Veterinarian: Contains bromadiolone, an anticoagulant. For humans or dogs that have ingested this product, or have obvious poisoning symptoms (bleeding) or prolonged ed prothrombin times, give Vitamin K₁ by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.
Environmental Hazards: This product is toxic to fish and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water.
STORAGE AND DISPOSAL
Storage: Store in original container in a cool, dry place inaccessible to children and pets.
Disposal: If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

Optional marketing claims

**MICE READILY ENTER AND FEED INSIDE
NO LOOSE BAIT
NO LOOSE PELLETS TO SPILL OR SCATTER
BAIT STATION LOCKS BAIT INSIDE!**

ACCEPTED
with **COMMENTS**
in EPA Letter Dated:

DEC 29 2005

Under the Federal Insecticide,
Fungicide, and Rodenticide Act

is amended for the pesticide
Registered under EPA Reg. No.
7173-245

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ THIS LABEL and follow all use directions and use precautions.
USE RESTRICTIONS: THIS IS NOT A TAMPER-RESISTANT BAIT STATION. DO NOT USE THIS PRODUCT IN AREAS ACCESSIBLE TO CHILDREN, PETS, DOMESTIC ANIMALS OR NONTARGET WILDLIFE. DO NOT USE THIS PRODUCT OUTDOORS. Use to control house mice in homes, industrial, commercial, agricultural and public buildings. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food.

(Left Side panel)

SELECTION OF TREATMENT AREAS: Determine areas where mice are most likely to find and consume bait. Generally, these areas are along walls, especially in corners and concealed places.
APPLICATION DIRECTIONS: Pull tabs on both sides outward, then twist off to allow mice to enter. Place bait station in horizontal position with top side against the wall, exposing both entrances. Space bait stations 8 to 12 feet apart along walls or in corners where mice or their signs have been seen. Replace bait stations if contents are consumed or contaminated, or if the carton is severely damaged and the bait is exposed. Placements not touched after 3 days should be moved to new locations where mouse activity is evident. Collect and dispose of all dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment.
