U.S. ENVIRONMENTAL PROTECTION AGENCY

Office of Pesticide Programs
Registration Division (7505C)
1200 Pennsylvania Ave., N.W.
Washington, D.C. 20460

EPA Reg. Number:

7173-251

Date of Issuance:

March 5, 2007

NOTICE OF PESTICIDE:

Registration
 Reregistration
(under FIFRA, as amended)

Term of Issuance:

Conditional

Name of Pesticide Product:

Rozol Paraffin Block

Name and Address of Registrant (include ZIP Code):

LiphaTech
3600 West Elm Street
Milwaukee, WI 53209

R-31 S-798122
1160

Attention: Mr. Thomas Schmit

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided that you:

A. submit one (1) copy of final printed labeling, before you release the product for shipment, with the following changes:

1. Modify the "Qualifier Statement" as follows: "One 12-ounce bait block provides enough bait to kill 3 to 6 rats".
2. Under "Mice", delete the sentence "Two pieces may be needed at points of extremely high mouse activity" a one piece (2 oz) is the normal rate for points of extremely high mouse activity.

Daniel B. Peacock, Biologist
Insecticide-Rodenticide Branch
Registration Division (7505C)

Date:

March 5, 2007

3. Add the registration number to your label, "EPA Reg. No. 7173-251".
4. Begin your "WARRANTY" text, with "To the extent consistent with applicable law, seller ...".
5. As required by the 1998 Rodenticide Cluster Reregistration Eligibility Decision (RED) document, the Agency may shortly require products such as this Chlorophacinone product, which contains field uses, to be a "Restricted Use Pesticide". EPA will send you a separate letter to you on this subject.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed. If you have any questions, please contact Dan Peacock by phone (703-305-5407), fax (703-305-6596), or E-Mail (peacock.dan@epa.gov).

Enclosures: 1. Stamped Label
 2. Minimum Type Sizes for Final Printed Label

PRECAUTIONARY STATEMENTS
 Hazard to Humans and Domestic Animals

CAUTION: Keep away from children, domestic animals and pets. May be harmful if swallowed or absorbed through the skin because it may reduce the clotting ability of blood and cause bleeding. Do not get in eyes, on skin or on clothing. Wear gloves when handling bait or retrieving dead animals. Wash arms, hands and face with soap and water after applying and before eating and smoking.

FIRST AID
 Have this label with you when obtaining treatment advice. If swallowed: Call a poison control center or doctor immediately for treatment advice.
 If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
 If on skin or clothing: Take off contaminated clothing. Rinse skin with plenty of cool water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
 Note to Physician or Veterinarian: Contains chlorophacinone, an anticoagulant. For humans or dogs that have ingested this product, or have obvious poisoning symptoms (bleeding) or prolonged prothrombin times, give Vitamin K₁ by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal.
ENVIRONMENTAL HAZARDS: This product is toxic to fish and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

STORAGE AND DISPOSAL
 Do not contaminate water, food or feed by storage or disposal. Storage: Store in original container in a cool, dry place inaccessible to children and pets.
 Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.
 Container Disposal: Dispose of empty container in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

WARRANTY: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

EPA Reg. No. 7173- Product No.
 EPA Est. No. 7173-WI-1 Label No.

Alternate "Storage and Disposal" statement for packaging intended solely for household use:

STORAGE AND DISPOSAL
 Storage: Store in original container in a dry place inaccessible to children and pets.
 Disposal: If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

Alternate warranty statements:
 Satisfaction guaranteed or your money back.

Paraffin Block
 FOR INDOOR AND OUTDOOR USE
 KILLS HOUSE MICE,
 NORWAY RATS, AND ROOF RATS

Active Ingredient: chlorophacinone	0.005%
Inert Ingredients	99.995%
Total	100.000%

KEEP OUT OF REACH OF CHILDREN
CAUTION: See side panel for additional precautionary statements.

ACCEPTED
 with COMMENTS
 in EPA Letter Dated

MAR 5 2007

Under the Federal Insecticide,
 Fungicide and Rodenticide Act
 as amended. The pesticide
 registered under EPA Reg. No.
 7173-251

DIRECTIONS FOR USE
 It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL and follow all use directions and precautions. For information on this product (including health concerns, medical emergencies or pesticide incidents) call the National Pesticide Information Center at 1-800-858-7378.

IMPORTANT: Do not expose children, pets or other nontarget animals to rodenticides. To help prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of reach of children, pets, domestic animals, and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are filled, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooded livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container, unused, spoiled, and unconsumed bait as specified on this label.

USE RESTRICTIONS: This product may be used to control Norway rats, roof rats and house mice in and around homes, industrial, commercial, agricultural and public buildings. It may also be used in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. This product is especially well suited for use in wet or damp areas, including river banks, gullies, irrigation ditches, railroad tracks, loading areas, under granaries, along fence lines and buffer strips, garbage dumps and landfills.

Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment. Do not apply bait directly to ground surface or in grass or other ground cover. Where necessary, apply in tamper-resistant bait stations to prevent nontarget animals from accessing the bait. Do not broadcast bait.

Selection of Treatment Areas: Determine areas where rats or mice are likely to find and consume bait, such as along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors or walls, or locations where rodents or their signs are seen. Remove as much alternative food as possible.

APPLICATION DIRECTIONS:
 (Qualifier statement only for package containing 12oz blocks.)
 One 12-ounce bait block provides enough bait to kill 3 to 12 rats.

Each block is scored to be broken into 2 oz. pieces.
Mice: Break block and apply one 2 oz. piece per placement, usually spaced 8 to 12 feet apart. Two pieces may be needed at points of extremely high mouse activity. Maintain an uninterrupted supply of fresh bait for 15 days or until signs of mouse activity cease.

Rats: Apply two to eight 2 oz. pieces per placement, usually spaced 15 to 30 feet apart. Maintain an uninterrupted supply of fresh bait for 10 days or until signs of rat activity cease.

For rat burrows, insert 1 to 2 pieces deep into each active burrow. Check treated burrows each morning and evening to make sure that bait has not been pushed out of burrows.

For sewer applications, securely attach one end of a wire to bait block and the other end to a stationary structure such as the bottom step of a manhole ladder or to a sewer grate, allowing just enough wire for bait to rest on manhole benching. If benching is not present, suspend bait a few inches above the high water line or place bait on a board supported by opposing steps of the ladder. Securing bait in this manner will minimize chances for removal by rats or water. Place at least one entire bait block per manhole.

Follow-up: Replace contaminated or spoiled bait immediately. Collect and dispose of all visible dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed. (22106)
