UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
WASHINGTON, D.C. 20460

OFFICE OF  
PREVENTION, PESTICIDES  
AND TOXIC SUBSTANCES

Rachel Callies  
Liphatech, Inc.  
3600 W. Elm St.  
Milwaukee, WI 53209

SEP 14 2009

Dear Ms. Callies:

Subject: Labeling Amendment to Difethialone 12g Mini Blocks  
EPA Registration No. 7173-284  
Submission Date: June 16, 2009

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable. However, this product is not consistent with the Agency's revised May 28, 2008 "Risk Mitigation Decision for Ten Rodenticides." EPA anticipates cancellation of those existing products that are not consistent with the Risk Mitigation Decision to occur no later than June 4, 2011. In the meantime, EPA is approving new registrations and amendments to existing registrations of rodenticide bait products, on a time-limited basis, so long as the registrations do not present greater risks of unreasonable adverse effects than existing products. Accordingly, this amendment is approved only subject to the condition that the registration shall expire on June 4, 2011. This condition of registration may be amended in conjunction with amendments to conform to the Risk Mitigation Decision. Absent such amendments, product released *for shipment by the registrant after June 4, 2011, would be in violation of FIFRA.*

A stamped copy is enclosed for your records. Please submit one (1) final printed copy for the above mentioned label before releasing the product for shipment. If you have any questions regarding this label, please contact Jennifer Gaines at (703) 305-5967.

Sincerely yours,

A handwritten signature in black ink, appearing to read "John Hebert", written over a large, stylized circular flourish.

John Hebert  
Product Manager (07)  
Insecticide-Rodenticide Branch  
Registration Division (7505P)

## PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals

**CAUTION:** Harmful if swallowed or absorbed through the skin because it may reduce the clotting ability of blood and cause bleeding. Keep away from children, domestic animals and pets. Causes moderate eye irritation. Do not get in eyes, on skin or on clothing. All handlers (including applicators) must wear: shoes plus socks, and gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

**User Safety Requirements:** Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco, or using the toilet and change into clean clothing.

**FIRST AID** Have this label with you when obtaining treatment advice. **If swallowed:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. **If in eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **If on skin or clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

**TREATMENT FOR PET POISONING:** If animal eats bait, call veterinarian at once.

**NOTE TO PHYSICIAN OR VETERINARIAN:** Contains difethialone, an anticoagulant. For humans or dogs that have ingested this product, or have obvious poisoning symptoms (bleeding) or prolonged prothrombin times, give Vitamin K<sub>1</sub> by intramuscular or oral administration. Check prothrombin time every 3 days until values return to normal. In severe cases, blood transfusions may be needed.

**ENVIRONMENTAL HAZARDS:** This product is extremely toxic to fish and wildlife. Predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

**STORAGE AND DISPOSAL:** Do not contaminate water, food or feed by storage or disposal.

**Pesticide Storage:** Store in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals. **Pesticide Disposal:** Wastes

resulting from the use of this product, and spoiled and unconsumed bait, may be disposed of on site or at an approved waste disposal facility. Never place unused product down any indoor or outdoor drain. **Container Handling:** Non-refillable container. Do not reuse or refill this container.

**Outer Bait Container:** Triple rinse (or equivalent) then offer for recycling or reconditioning; or puncture and dispose of in a sanitary landfill; or incinerate. **Bait pack:** Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration.

**WARRANTY:** To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

EPA Reg. No. 7173-284

EPA Est. No. 7173-WI-1

**DIRECTIONS FOR USE:** It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **READ THIS LABEL** and follow all use directions and use precautions. **IMPORTANT:** Do not expose children, pets or other nontarget animals to rodenticides. To help prevent accidents: 1. Store product not in use in a location out of reach of children and pets. 2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock, raccoons, bears, other potentially destructive animals, or in areas prone to vandalism. 3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

**USE RESTRICTIONS:** This product may only be used to control Norway rats, roof rats and house mice. Do not place near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment. Do not broadcast bait. Use only for the sites, pests, and application methods described on this label.

**Urban Areas:** This product may be used in and around homes, industrial, commercial, agricultural and public buildings, food processing facilities and similar man-made structures. May also be used in transport vehicles (ships, trains, aircraft) and in and around related port or terminal buildings. This product may also be used in alleys and sewers. **Non-urban areas:** This product may only be used inside of homes and agricultural, industrial and commercial buildings.

**Selection of Treatment Areas:** Determine areas where rats or house mice will most likely find and consume bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors or walls, or in locations where rats and house mice or their signs have been seen. Remove as much alternative food as possible.

**APPLICATION DIRECTIONS:**

- Qualifier statement for 9 count package:* This package contains enough bait (3.8 oz.) to kill 1 rat.
- Qualifier statement for 10 count package:* This package contains enough bait (4.2 oz.) to kill 1 to 3 rats.
- Qualifier statement for 12 count package:* This package contains enough bait (5.1 oz.) to kill 1 to 5 rats.
- Qualifier statement for 14 count package:* This package contains enough bait (5.9 oz.) to kill 2 to 6 rats.
- Qualifier statement for 16 count package:* This package contains enough bait (6.8 oz.) to kill 2 to 7 rats.
- Qualifier statement for 20 count package:* This package contains enough bait (8.5 oz.) to kill 3 to 8 rats.
- Qualifier statement for 25 count package:* This package contains enough bait (10.6 oz.) to kill 3 to 10 rats.
- Qualifier statement for 30 count package:* This package contains enough bait (12.7 oz.) to kill 4 to 11 rats.

**House Mice:** Apply one block per placement. Two blocks may be needed at points of very high house mouse activity. Space placements 8 to 12 feet apart. Maintain a constant supply of fresh bait for 15 days or until signs of house mouse activity cease. **Rats:** Apply ten to thirty-seven blocks per placement, usually spaced 15 to 30 feet apart. Maintain a constant supply of fresh bait for 10 days or until signs of rat activity cease. **For sewer** applications, securely attach one end of a wire to bait blocks and the other end to a stationary structure such as the bottom step of manhole ladder or to a sewer grate, allowing just enough wire for bait to rest on manhole benching. If benching is not present, suspend bait a few inches above the high water line or place bait on a board supported by opposing steps of the ladder. Securing bait in this manner will minimize chances for removal by rats or water. Place at least 29 bait blocks per manhole. **Follow-up:** Replace contaminated or spoiled bait immediately. Wearing gloves, collect and dispose of all visible dead animals and leftover bait properly. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation occurs, repeat treatment. For a continuous infestation, set up permanent bait stations and replenish bait as needed.

**Selection of Treatment Areas:** Determine areas where rats or house mice will most likely find and consume bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors or walls, or in locations where rats and house mice or their signs have been seen. Remove as much alternative food as possible.

**APPLICATION DIRECTIONS:**

*Qualifier statement for 9 count package:* This package contains enough bait (3.8 oz.) to kill 1 rat.

*Qualifier statement for 10 count package:* This package contains enough bait (4.2 oz.) to kill 1 to 3 rats.

*Qualifier statement for 12 count package:* This package contains enough bait (5.1 oz.) to kill 1 to 5 rats.

*Qualifier statement for 14 count package:* This package contains enough bait (5.9 oz.) to kill 2 to 6 rats.

*Qualifier statement for 16 count package:* This package contains enough bait (6.8 oz.) to kill 2 to 7 rats.

*Qualifier statement for 20 count package:* This package contains enough bait (8.5 oz.) to kill 3 to 8 rats.

*Qualifier statement for 25 count package:* This package contains enough bait (10.6 oz.) to kill 3 to 10 rats.

*Qualifier statement for 30 count package:* This package contains enough bait (12.7 oz.) to kill 4 to 11 rats.

1. **Clean up:** Eliminate possible rodent food sources. Store food in sealed containers and sweep up food spills.
2. **Select Areas for Placement:** Focus on areas where rats and house mice have been active - generally along walls, between floors or wall, inside cabinets, under appliances, in basements, attics or garages. Be sure to place out of reach of children and pets.
3. **Place Blocks:** For house mice apply 1 block per placement, usually spaced 8 to 12 feet apart. For rats apply 10 to 37 blocks per placement, usually spaced 15 to 30 feet apart.
4. **Dispose:** Maintain a constant supply of fresh bait for 15 days for house mice and 10 days for rats, or until signs of activity has stopped. Wear gloves to collect and dispose of all visible dead animals and remaining bait.
5. **Prevent:** To prevent another infestation, limit sources of rodent food and water as much as possible.
