

### DIRECTIONS FOR USE

Initial dose: 1 gallon Algicide 100 to 50,000 gallons of water.

Maintenance dose: 1 quart Algicide 100 to 50,000 gallons of water.

Initial dose is used in filling pool at beginning of season or for treating water left in pool over winter to control growth of algae during the winter.

If algae are visible in the pool, the initial dose should be repeated within 48 hours after killed algae are removed from the pool.

Maintenance dose should be added at least once every 7 days. If high temperatures prevail or pool has unusually heavy use, add maintenance dose more frequently.

If makeup water is added at the rate of more than 10% per week of the pool capacity, add 1 quart of Algicide 100 for each 10,000 gallons of fresh makeup water added per week.

For use as pool-side surface germicide:

After cleaning surfaces, use 1 ounce Algicide 100 to 4 gallons of water for sanitizing or 1 ounce of Algicide 100 to 2 gallons of water for disinfecting. At these dilutions, Algicide 100 will also deodorize surfaces efficiently.

## ALGICIDE 100

Concentrated Swimming Pool Algicide and Pool-side Surface Germicide

Keeps Pool Water Clear and Free of Growing Algae — Reduces Chlorine Demand — Controls Algal Slimes

Active Ingredients:

n-Alkyl (60% C <sub>14</sub> , 30% C <sub>16</sub> , 5% C <sub>12</sub> , 5% C <sub>13</sub> ) dimethyl benzyl ammonium chlorides	8.4%
n-Dialkyl (60% C <sub>11</sub> , 30% C <sub>16</sub> , 5% C <sub>12</sub> , 5% C <sub>14</sub> ) methyl benzyl ammonium chlorides	1.6%

Inert Ingredients:	90.0%
	<u>100.0%</u>

**CAUTION**

Keep Out of Reach of Children.

See Side Panel for Additional Cautions.

### DESCRIPTION

When Algicide 100 is used as directed, it will kill and prevent development of *Chlorella pyrenoidosa* (green), *Phormidium inundatum* (black algae), *Phormidium retzii*, *Lyngba versicolor* (blue-green) and other swimming pool algae.

Algicide 100 is non-toxic, non-irritating and non-corrosive when used at pool dilutions as recommended. Algicide 100 will not harm pool equipment. Algicide 100 is compatible with most commonly used swimming pool chemicals but should not be mixed with soap or other cleaners or premixed with other water-treating chemicals. Algicide 100 works best when added by itself directly to pool water.

CAUTION: Harmful if swallowed. Avoid contact with skin or eyes. In case of contact with skin and eyes wash thoroughly with water. If irritation persists, get medical attention. Algicide 100 is not a foodstuff and should not come in contact with food.
