

FORFOG - PBPP concentrate is a semi-concentrated, specialized fog concentrate for use in food processing plants, restaurants, dairy barns and food storage warehouses. It is effective against a wide range of pests including flies, roaches, crickets, beetles, and others. For more information, contact your distributor or Forshaw Chemicals, Inc., 650 State Street, Charlotte, N.C. 28208.

DIRECTIONS

For use in food processing plants, FORFOG - PBPP is a specialized fog concentrate for use in food processing plants, restaurants, dairy barns and food storage warehouses. It is effective against a wide range of pests including flies, roaches, crickets, beetles, and others. For more information, contact your distributor or Forshaw Chemicals, Inc., 650 State Street, Charlotte, N.C. 28208.

Use Fog equipment in accordance with manufacturer's direction. Dosage by fogging should be 2 to 6 ounces per 1,000 cubic feet of space. Repeat treatments at intervals as needed. Do not remain in treated areas, ventilate the area after treatment is completed. Spray application for crawling insects named above, thoroughly spray with a coarse wet spray with repeated treatments into all parts of rooms suspected of harboring these pests. Pay particular attention to cracks and hidden surfaces around sinks or food storage areas where these insects may be hiding. This is a contact insecticide and it is necessary in all cases that the insects be contacted directly with the spray to obtain results.
