**DIRECTIONS----BRUSH CONTROL**

Rights of Ways - Roadsides  
Drainage Ditches - Rangelands - Pastures

FORTRIM Weed and Brush Killer Solution, applied as a foliar spray, is highly effective for killing most woody plants, including hardwood and coniferous species such as alder, ash, birch, cedar, elm, gum, hickory, maple, oak, pine and willow.

**FOLIAGE SPRAY APPLICATION**

Prepare spray (water solution or oil-water emulsion), and apply any time after brush has reached the full-leaf stage until foliage begins to discolor, preferably during periods of high temperatures and high humidity. Apply as a full-coverage spray to foliage, stems, limbs, and base of brush; thorough coverage is essential for best results. In roadside applications on tall, dense brush, it is often necessary to spray from field side as well as road side. Spraying away from crops planted close to right of ways will aid in preventing contact of crops with spray or drift; coarse sprays are less likely to drift. The product is not volatile.

**SPRAY PREPARATION**

**WATER SOLUTION--FOR EACH 100 GALS. OF SPRAY:**  
Use 10 gals. product with hydraulic equipment; use 18 to 72 gals. with air blast equipment. To improve wetting of foliage, add 4 to 8 fl.ozs. Du Pont Spreader-Sticker or 1 qt. Du Pont Surfactant WK.

**OIL-WATER EMULSION-FOR EACH 100 GALS. OF SPRAY:** With hydraulic equipment use 9 gals. product plus a pre-mix (prepared in water-free container) of 2/3 pt. Du Pont Emulsifying Agent A in 4 gals. of No. 2 fuel oil. Fill spray tank 1/4 full of water; start agitator, add product; add pre-mix; dilute to proper volume with water. For air blast equipment, use 18 to 40 gals. product plus pre-mix of 1 qt. Du Pont Emulsifying Agent A in 4 gals. of No. 2 fuel oil; prepare spray mixture as above.

WEED & BRUSH KILLER

SOLUTION

**AMMATE WEED & BRUSH KILLER SOLUTION**

**ACTIVE INGREDIENT**  
Ammonium Sulfamate 48.4%  
**INERT INGREDIENTS** 51.6%  
10.9 Lbs./Gal. @ 60° F.

Keep out of reach of children.

**CAUTION! MAY CAUSE SKIN IRRITATION.**

Avoid contact with skin. In case of contact, wash off with plenty of water.  
Harmful if swallowed.

**GENERAL INFORMATION:** This product is a water solution containing the equivalent of 5.5 lbs. Du Pont "Ammate" X Weed and Brush Killer per gal. It is highly effective for killing undesirable woody plants and for use as a contact spray for control of weeds and grasses. Temporary non-productivity of soil may be caused by heavy applications of this product; this condition usually disappears in the "over-winter" period. Some species of woody plants and perennial weeds are difficult to control, and re-treatment may be necessary if regrowth occurs.

This product is non-volatile and non-flammable.  
**IMPORTANT:** "Ammate" is non-selective; do not apply to, or drain, or flush equipment on desirable plants or vegetation, as injury may result. Do not drain or flush equipment near domestic waters. Wash sprayer thoroughly after use to remove all herbicidal solution and to reduce corrosion. Use of this product as an oil-water emulsion minimizes corrosion of equipment. If oil-water emulsion is not used, commercial equipment should be coated with an asphaltic base paint; or thoroughly wash exterior of equipment at end of each day and apply protective coating of oil each week or as often as practical. When equipment is down for week-end, wash exterior and coat with oil; for end-of-season storage, wash inside and outside and coat with oil.

**DIRECTIONS----WEED AND  
GRASS CONTROL**

Tennis Courts - Driveways  
Fence Rows - Industrial Sites

Applied as a water solution or as an oil-water emulsion, FORTRIM Weed and Brush Killer Solution is an effective contact spray for control of: ~~woody plants~~ such as poison ivy, poison oak, and poison sumac. Perennials such as leafy spurge, bitter dock, goldenrod, perennial ragweed, milkweed, and blueweed; and Annuals such as crabgrass, broomweed, chickweed, cocklebur, jimson weed, lambsquarters, larkspur, prickly lettuce ragweed and shepherdspurse.

Use at rate of 18 gals. product per 100gals. spray, either as water solution or as oil-emulsion. Prepare respective spray mixture as directed under "Brush Control" for hydraulic equipment. Thoroughly wet foliage and stems of undesired vegetation. The degree of control and duration of effect will vary with weed species, rainfall, temperature and other conditions.

**NOTICE TO BUYER**—Seller warrants that this product conforms to the chemical description on the label and is reasonably fit for purposes stated on such label only when used in accordance with directions under normal use conditions. This warranty does not extend to use of this product contrary to label use directions, or under abnormal use conditions, or under conditions not reasonably foreseeable to seller; buyer assumes all risk any such use. Seller makes no other warranties, express or implied.
