FORSYN 1% FOG

CONCENTRATE

A New Synthetic Pyret[illegible]id for Control of Flies and Mosquitoes

This formulation of FORSYN 1% FOG Concentrate is to be used diluted with one gal. Deodorized Kerosene in only such portable thermal applicator equipment that can deliver spray particles [illegible] within the aerosol size range. To prepare a [illegible] ready-to-use spray, dilute 24 ozs. FORSYN 1% FOG Concentrate with one gal. deodorized kerosene.

THERMAL APPLICATIONS INDOORS-For the control of flies, mosquitoes and insects in warehouses, restaurants and industrial institutions. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using this product in these areas, apply only when the facility is not in operation. ***

Extinguish all flames or pilot lights. Apply as a dry fog at the rate of 1-1 [illegible] fluid ozs. per 1,000 cu.ft. of space. Direct the thermal applicator toward the upper corners of the room and the ceilings. Close off room for at [illegible] minutes. Do not return to treated areas. Ventilate thoroughly before reentry.

THERMAL APPLICATIONS OUTDOORS-For reduction in annoyance from [illegible] mosquitoes, and insects in yards, patios, around swimming pools, picnic areas, camp sites, drive-ins, [illegible] stables, and other small area applications. Hold thermal applicator [illegible] at least five feet from any object, especially plants, and [illegible] avoid wetting any plant foliage. Treat with FORSYN 1% FOG Concentrate diluted with one gal. [illegible] at the rate of 3-6 fluid ozs. per 1,000 cu.ft. [illegible] for the most effective [illegible] Treat in the direction of the wind. Do not apply when the air temperature is [illegible] approximately the same. Direct the [illegible] of the treated area. Do not enter the treated [illegible] until spray has settled. Repeat applications [illegible]

***Remove or cover exposed food and food handling surfaces. Remove [illegible] and plant life. Shut off ventilating systems, air ducts, air-[illegible] equipment and close off room or area to be treated.

ACTIVE INGREDIENTS:	
*(5-Benzyl-3-furyl)methyl 2,2-dimethyl-3-(2-methylpropenyl) cyclopropane carboxylate	1.00%
Related compounds	0.135%
Aromatic petroleum hydrocarbons	1.525%
Petroleum distillate	97.500%
INERT INGREDIENTS:	0.050%
	100.000%

*Cis trans isomers ratio max. 30% cis and min. 70% d-trans.
-U.S. Patent No. 3,[illegible]
