

FORMULA 210

FRONT LABEL:

FORMULA 210

GERMICIDAL CONCENTRATE & SANITIZER

ACTIVE INGREDIENTS:

n-alkyl (60% C14, 30% C16, 5% C12, 5% C18)  
dimethyl benzyl ammonium chloride

50%

INERT INGREDIENTS

50%

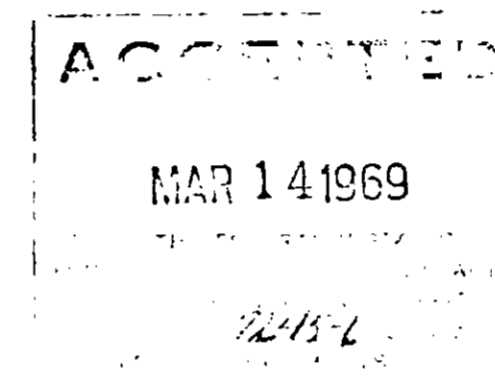

100%

PHENOL COEFFICIENTS:

Salmonella typhosa 220  
Staphylococcus Aureus 368

DANGER

KEEP OUT OF REACH OF CHILDREN  
HARMFUL OR FATAL IF SWALLOWED  
SEE SIDE PANEL FOR OTHER CAUTIONS.

Net Contents: 12 fl. ounces

LEFT SIDE LABEL:

Sanitizing showers, stalls, bathtubs, floors, toilet seats:

Clean surface with HASTE at "B" level. Rinse thoroughly and then sanitize with a solution of 1 teaspoon Germicidal per gallon of water, either wiped or sprayed on. Allow to dry on the surface. The residual germicide on the surface gives effective inhibition activity after treatment when used in this manner.

Sanitizing diapers:

After laundering, rinse diapers in a one teaspoon Germicidal to one gallon of water solution and allow diapers to dry without rinsing, so a residual is left in the diapers. This prevents urine decomposition by micro-organisms, which cause irritation commonly identified as diaper rash.

Sanitizing and deodorizing refrigerators, cupboards, storage bins, bread boxes, etc.:

Wipe or spray on a solution of 1 teaspoon Germicidal per gallon of water after cleaning with Haste at "B" level, and rinsing with clean water. Do not allow Germicide to come in contact with food.

Sickroom:

Sanitize all utensils used in sick room by allowing to stand for at least two minutes in a solution of one teaspoon Germicidal per gallon of water. Bedding and
