DIRECTIONS FOR USE

1. Apply 1/2 pint of the product per 1000 square feet of foliage, fruit, or other surface to be treated. Use as a contact spray in the reduction of leaf-miner damage on standard leafy vegetables.

A fine spray is proper for application. Test against a sheet of non-absorbent material at approximately 10 feet from nozzle. A barely wet surface setting is rate wet damage could occur to foliage, fruit, or to grass. If not wet evenly, satisfactory insect control will not be obtained. Do not apply to plants with frost damage. Do not apply to plants with frost damage. Do not apply to plants with frost damage.

INSECTICIDE 120

CONTAINS DDT 90% BY WEIGHT

FOR FOGGING USE ONLY IN CONTAINED AREAS

WARNING

KEEP OUT OF REACH OF CHILDREN

Active Ingredients:

NET CONTENTS GALLONS

Use of Malathion and DDVP may cause cholinesterase inhibition. Atropine and total 2 P AM is also antidote and may be administered in conjunction with Atropine.

A fine spray is proper fogging machine setting. Test against a sheet of non-absorptive material at approximately 15 feet from nozzle. Barely wet is correct setting. If quite wet, damage could occur to foliage, car paint or to glass. If not wet enough satisfactory insect control will not be obtained.

WARNING

Harmful or fatal if swallowed, inhaled or absorbed through skin. Avoid inhaling vapor, fog or mist. Do not breathe spray mist. Do not get into eyes or on skin. Wear protective clothing. Wear natural rubber gloves. Wash clothing before reuse. Keep unprotected persons out of operational area. When fogging, use a mask or respirator of a type passed by the U. S. Bureau of Mines for Vapona** (DDVP) protection. Do not apply to food crops. Avoid contamination of feed and foodstuff. Keep away from heat or open flame. In case of contact, wash with plenty of soap and water and always before smoking or eating, after handling. KEEP OUT OF REACH OF CHILDREN.
