

DIRECTIONS FOR USE

Stir well until the contents have the same consistency. Before treatment, remove all decayed and rot wood.

When a hole is drilled in a pole or stub, there should be applied a coating of 1/4 inch thickness around the exposed perimeter of the hole in a band 18 to 24 inches wide extending 2 to 4 feet above the ground line. Close the treated area with a suitable plastic or wax paper to increase the contact mass of the treatment.

The active ingredients, 10-18-Dichloro-2,4,6-Trichlorophenol, which meets the Federal Specification TT-A-570 and American Wood-Preservers' Association Specification P-3. The solvent system meets the AWWA Specification P-3 for heavy petroleum solvent.

CAUTION

Keep out of reach of children.
Do not use near food, feed, or water.
Do not use near electrical wiring.

If product becomes oily, stir well and then stir in water sparingly to restore the product to its original creaminess. Do not add more water than is necessary. Generally only a few ounces of water will be needed to restore creaminess of this product.

For more information, contact your distributor or the manufacturer.
