

To protect your children and pets, a child-resistant cap has been provided for Basic-G. To open the container, apply *light* downward pressure on the cap, then turn counter-clockwise, then release pressure and the cap should pop out. The cap should then be removed and the cap should be resistant to tampering by children.

To reseal the bottle, simply screw down the cap with normal pressure. No special tightening is required.

As with all Shaklee Household Products, Basic-G is highly concentrated. Because of its germicidal ingredients, extra safety precautions are required when handling this *concentrate*. A special danger notice is included on the label and reads as follows:

DANGER:

Corrosive. Keep out of children's hands. Causes severe eye and skin damage. Do not get on clothing. Harmful or fatal if swallowed. Avoid breathing vapors.

FIRST AID:

In case of contact with eyes, flush eyes with plenty of water; for at least 15 minutes. If in eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of water, egg whites, gelatin solution, or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

We'll call on you!
