MADE IN U. S. A.

REGISTERED IN U. S. A.

- 1 oz.
- 2 oz.
- 3 oz.
- 4 oz.
- 5 oz.
- 6 oz.
- 7 oz.

DIRECTIONS

For the Prevention of Algae Growth in Clear Water or at the time you fill your pool, add one ounce of ALGIMYCIN 300 for each 1000 gallons of pool water for the first treatment. Then add one-half (1/2) ounce per 1000 gallons twice a week. Every time you refill your pool, begin again with the first treatment.
For Pool Water with Visible Algae Growth, use two ounces of ALGIMYCIN 300 for the first treatment followed by one-half (1/2) ounce twice weekly. Do not mix undiluted ALGIMYCIN "300" with other pool chemicals before application to the pool.

Method of Application —

Use the ounce markings on the side of the bottle to dispense the required amount of ALGIMYCIN 300. Pour directly into the pool. Replace cap and immerse the bottle in the pool water to dissolve any ALGIMYCIN-300 which may adhere to the outside of the bottle. ALGIMYCIN 300 is readily soluble and diffuses rapidly throughout the water.

WARNING goes here

Algimycin 300 Contains

ACTIVE INGREDIENTS — Phenyl Mercuric Acetate
Alkyl[®] Amine Acetate (from the fatty acids of coconut oil)
INERT INGREDIENTS — Water, Diethyleneglycol Monosteryl Ether, Sodium Propionate,
