GENERAL INFORMATION

ALGIMYCIN GLB-X is designed for the control of algae found in most small ornamental ponds and pools.

One half pound of ALGIMYCIN GLB-X treats [illegible] gallons of pond water.

For best results start ALGIMYCIN GLB-X as soon as algae appears in the pond. ALGIMYCIN GLB-X is effective even when algae is present, but it may take longer to eliminate them once they have become established. If possible stop the flow of water to the pond for a period of [illegible] to a minimum of a period of at least 48 hours after application of ALGIMYCIN GLB-X. This will assure that the active ingredients of ALGIMYCIN GLB-X in the pond for a sufficient time to control and prevent the growth of algae. If a continuous flow of water must be maintained through the pond, it may be necessary to repeat the treatment after three or four days.

HOW MUCH ALGIMYCIN GLB-X TO USE

1. **For the Prevention and Control of Algae Growth in Most Small Ornamental Ponds and Pools,** use [illegible] of ALGIMYCIN GLB-X for every 2,500 gallons of water.
2. **For Ponds or Pools with Heavy Algae Infestation** [illegible] before applying the product.

POND CAPACITY	AMOUNT OF ALGIMYCIN GLB-X REQUIRED
625 gallons	[illegible]
1,250 gallons	[illegible]
2500 gallons	[illegible]
5000 gallons	[illegible]

METHOD OF APPLICATION
