

John D. Puetz  
Great Lakes Biochemical Co. Inc.  
6120 West Douglas Ave.  
Milwaukee, WI 53218

Dear Mr. Puetz:

Subject: Revised Labeling - Add Lower Dosage  
Algimycin PLL  
EPA Registration No 7364-10  
Your Submission Dated May 11, 1992

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended is acceptable provided that you:

1. Make the labeling changes listed below before you release the product for shipment bearing the amended labeling:

a. Add "It is a violation of federal law to use this product in a manner inconsistent with its labeling" to below the heading DIRECTIONS FOR USE.

b. Above "Harmful if swallowed" add the headings:

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

c. Before "This product may be toxic to trout and other species of fish" delete CAUTION and add the heading:

**ENVIRONMENTAL HAZARDS**

2. Submit one (1) copy of your final printed labeling before you release the product for shipment.

A stamped copy of the labeling is enclosed for your records.

Sincerely yours,

Cynthia Giles-Parker  
Product Manger (22)  
Fungicide Herbicide Branch  
Registration Division (H7505C)

Enclosure

## GENERAL INFORMATION

ALGIMYCIN PLL is a liquid formulation designed for the control of algae commonly found in most small ornamental ponds and pools. This 1 liter bottle of ALGIMYCIN PLL will treat 4,000-8,000 gallons of pond water. For best results it is suggested that treatments be started before algae growth is visible. If algae growth is already visible, it is advisable to clean the pool as much as possible before adding ALGIMYCIN PLL.

If possible, stop the flow of water through the pool or pond to be treated or reduce it to a minimum for a period of 24 to 48 hours after application of ALGIMYCIN PLL. This will assure an adequate concentration of ALGIMYCIN PLL in the pond for a sufficient time to react with the algae to be controlled. If a continuous flow of water must be maintained through the pool, it may be necessary to repeat the initial treatment after three or four days.

### HOW MUCH ALGIMYCIN PLL TO USE

- For Ponds or Pools with No Visible Algae Growth, use 2-4 ounces of ALGIMYCIN PLL for every 1000 gallons of water.
- For Ponds or Pools with Visible Algae Infestation, clean the pond or pool before applying the ALGIMYCIN PLL.

Pool or Pond Capacity	Amount of ALGIMYCIN PLL Required	Pool Capacity	Amount of ALGIMYCIN PLL Required
10,000 - 15,000 gal.	2-4 oz.	4,000 gal. to 8,000 gal.	8-16 oz.

### METHOD OF APPLICATION

- For best results clean pond thoroughly before applying ALGIMYCIN PLL. Do not apply more than the recommended dose at one time.
- Mix the required amount of ALGIMYCIN PLL in a small bucket of water or a sprinkling can. Use the ounce markings on the side of the bottle.
- Distribute the solution uniformly into the water to be treated while walking slowly around the edge of the pond or pool.
- Repeat the treatment when algae growth first begins to re-appear. This is normally once a month. However, if there is a continuous flow of water or if conditions cause excessive algae formation, re-treatment may be required more frequently.

**CAUTION:** This product may be toxic to trout and other species of fish. Large quantities of decaying algae may reduce the oxygen content of the water to a point to cause fish kill. It is best to remove large masses of floating algae manually before treatment if fish are present in the pond. Avoid contact with or drift to desirable plants or crops, since concentrated ALGIMYCIN PLL may cause injury.

### STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Store in original container in a cool dry place. Keep from freezing. Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke. Wastes resulting from this product may be disposed of on site or at an approved waste disposal facility.

ACCEPTED  
with COMMENTS  
In EPA Letter Dated:

Under the Federal Insecticide, Fungicide, and Rodenticide Act amended, for the pesticide registered under EPA Reg. No. 7364-10

EPA Est. No. 7364-10-1

EPA Reg. No.

# liquid algicide

ALGIMYCIN PLL is a water soluble liquid formula designed to control the growth of algae found in ornamental ponds and pools.

This 1 liter bottle of ALGIMYCIN PLL will treat 4,000-8,000 gallons of water.

#### ACTIVE INGREDIENTS:

\*Copper as metallic (in the form of chelates of copper citrate and copper gluconate) .....

#### INERT INGREDIENTS: .....

TOTAL .....

(\*Contains 0.42 lbs. of copper per gallon.)
