maintenance program and not as a substitute or replacement for disinfection, pH and atkalinity control, etc. HOW MUCH TO USE: 1. For the Prevention of Algae Growth or for Pool Water with Visible "Free-

FOR RAPID, EFFECTIVE CONTROL OF WOST ALEAE FOUND IN STRUMENC POOLS ALGAE SHOCK granular algicide is formulated to control algae found in most swimming pools. This algicide is designed to be used as a part of a regular pool

Floating Algae, use four ounces (4 oz.) of ALGAE SHOCK granular algicide for every 5,000 gettons of water. Sprinkle uniformly over the surface of the water or mix required amount of ALGAE SHOCK granular algicids into a bucket of water or sprinkling can and distribute the mixture uniformly throughout the pool water, being careful to avoid spillage or wind carried spray. Repeat the treatment weekly (4 oz. per 5,000 galians of water) throughout the swimming \$66500.

 For Water with Established "Black Algaer, use four ounces (4 oz.) of ALGAE SHOCK granular algicide for every 5,000 gallons of water. Apply the proper losage by sprinkling the algicide where the algae growth appears, such as along walls and over areas where algae spots are visible, Some granules will dissolve rapidly, but others will fall to the bottom of the pool on patches of

algae in the surrounding area.

For Severe infestations of Black Algae, it is advisable to shut off the fifter pump and allow the water to settle down. Apply the proper dosage (4 oz. per 5,000 gallons of water) by sprinkling over areas of the pool where "Black Algae are established. The granules of algicide will descend through the water. Some granules will dissolve rapidly but others will settle to the bottom on the patches of algae killing them in a matter of hours. Allow 4 to 6 hours for the algoride to act before reactivating the filter pump. Repeat the applicafrom twice weekly until the argae have disappeared. Then follow directions For the Prevention of Algae Growth using 4 oz. per 5,000 gallons of water WOOK Y

IMPORTANT. Because of the potency of this product, heavy concentrations of granules on localized areas of the pool may cause discoloration of vinyl lines and painted pools. Discotoration can be prevented by brushing the granules which remain on the bottom lightly with a pool brush to distribute them so that the full effect is not concentrated on any one Spot,

DANGER MAY BE FATAL IF SWALLOWED . CAUSES EYE IRRITATION . MAY CAUSE SKIN IRRITATION . IF EYE IMPITATION PERSISTS, GET MEDI-CAL ATTENTION . MAY CAUSE ALLERGIC SKIN IRRITATIONS . STRONG OXIDIZING MATERIAL. Contact with organic matter may cause fire or decomposition. Will burn with evolution of chlorine or equally toxic gases. May produce chemical burns. Contact with heat, moisture, foreign material or contamination from any source may result in fire, Keep cover closed when not in use. Store in cool dry place.

Rinse empty container thoroughly with water and discard it.

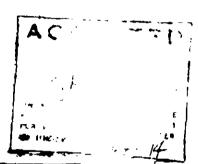

Wash after handling.

Avoid contact with skin, eyes or clothing.

Avoid contamination of or storage near feed or foodstuffs.

Avoid inhalation of dust or spray mist,

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water.

QUALITY SWIMMING POOL CHEMICALS FROM

FOR RAPIB, EFFECTIVE CONTROL OF MOST ALGAE FOUND IN SWMMING POOLS ALGAE SHOCK granular algicide is formulated to control algae found in most swimming pools. This algicide is designed to be used as a part of a regular pool maintenance program and not as a substitute or replacement for disinfection, pH and alkalinity control, etc.

HOW MUCH TO USE

For the Prevention of Algae Growth or for Pool Water with Visible "Free-Floating Algae, use four ounces (4 oz.) of ALGAE SHOCK granular algicide for every 5,000 gallons of water. Sprinkle uniformly over the surface of the water or mix required amount of ALGAE SHOCK granular algicide into a bucket of water or sprinkling can and distribute the mixture uniformly throughout the pool water, being careful to avoid spillage or wind carried spray. Repeat the treatment weekly (4 oz. per 5,000 gallons of water) throughout the swimming season.

? For Water with Established "Black Aigae", use four ounces (4 oz.) of ALGAE SHOCK granular algicide for every 5,000 galtons of water. Apply the proper tosage by sprinkling the algicide where the algae growth appears, such as along walls and over areas where algae spots are visible. Some granules will dissolve rapidly, but others will fall to the bottom of the pool on patches of

algae in the surrounding area.

For Severe infestations of 'Black Algae', it is advisable to shut off the filter pump and allow the water to settle down. Apply the proper dosage (4 oz. per 5,000 gations of kater; by sprinkling over alleas of the pool where "Black A gue are established. The granules of algicide will descend through the kater. Sime granules will dissolve rapidly but others will settle to the bottom on the patches of algae killing them in a matter of hours. Allow 4 to 6 hours time at the second reactivating the filter pump, Repeat the application that a keek yount' the algae have disappeared. Then follow directions for the Revenue of Algae Growth using 4 oz. per 5,000 gallons of water week's

IMPORTANT. Because of the potency of this product, heavy concentrations of granules on localized areas of the poor may cause discoloration of vinyl lired and painted poors, Discoloration can be prevented by brushing the granules which remain on the bottom lightly with a pool brush to distribute them so that the full effect is not concentrated on any one spot.

DANGER MAY BE FATAL IF SWALLOWED • CAUSES EYE IRRITATION • MAY CAUSE SKIN IRRITATION • IF FYE IRRITATION PERSISTS, GET MEDICAL ATTENTION • MAY CAUSE ALLERGIC SKIN IRRITATIONS • STRONG OXIDIZING MATERIAL Contact with rigenic matter may cause fire or decomposition. Will burn with evolution of chlorine or equally toxic gases. May produce chemical burns. Contact with heat, missture, foreign material or contamination from any source may result in tire. Keep cover closed when not in use. Store in cool dry place.

Rinse empty container thoroughly with water and discard it.
