QUALITY SWIMMING POOL CHEMICALS FROM

**FOR RAPID EFFECTIVE CONTROL OF MOST ALGAE FOUND IN SWIMMING POOLS**  
**ALGIMYCIN "G"**

Algimycin "G" is a granular algicide which kills established algae and prevents new growth. It is suitable for use in swimming pools, hot tubs, and spas. For directions for use, see the back panel of the container. (DIRECTIONS GIVEN IN U.S. GALLONS)

**HOW MUCH TO USE (4 OZ. = 1 MEAS. CUP)**

1. **For Prevention of Algae Growth:** Add 1/2 lb (1 1/2 MEAS. CUP) of ALGIMYCIN "G" granular algicide to 10,000 gallons of water. Distribute evenly over the surface of the water. Repeat every 2 weeks. For distribution of the material, form a ring of water with your hands, and distribute the material in a ring around the pool. Repeat every 2 weeks.
2. **For Control of Established Green Algae:** Add 1 lb (3 MEAS. CUP) of ALGIMYCIN "G" granular algicide to 10,000 gallons of water. Apply the material to the green algae. Stir the water to distribute the material. Repeat every 2 weeks. If the algae is not completely controlled, repeat the application. The material will kill the algae and prevent new growth. Repeat every 2 weeks.
3. **For Control of Established Black Algae:** Add 1 lb (3 MEAS. CUP) of ALGIMYCIN "G" granular algicide to 10,000 gallons of water. Apply the material to the black algae. Stir the water to distribute the material. Repeat every 2 weeks. If the algae is not completely controlled, repeat the application. The material will kill the algae and prevent new growth. Repeat every 2 weeks.
