OFFICE OF PESTICIDES PROGRAMS
REGISTRATION DIVISION (TS-767)
WASHINGTON, DC 20460

EPA REGISTRATION NO.

7364-44

DATE OF ISSUANCE

JUN 26 1995

TERM OF ISSUANCE

NOTICE OF PESTICIDE: REGISTRATION
 REREГИSTRATION

(Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended)

NAME OF PESTICIDE PRODUCT

Tabex Chlorination Tablets
Feeder Canister

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Great Lakes Biochemical Co., Inc.
6120 W. Douglas Avenue
Milwaukee, WI 53218

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Make the following labeling changes before you release the product for shipment:

1. Revise the Precautionary Statements and Statement of Practical Treatment in accordance with Attachment A for Batch 31 products.
2. On the right panel above "Danger" add the heading "Precautionary Statements" and "Hazards to Human and Domestic Animals".
3. The signal word "Danger" must be placed under "Keep Out of the Reach of Children" on the front panel.

ATTACHMENT IS APPLICABLE

SIGNATURE OF APPROVING OFFICIAL

DATE

4. Revise the Environmental Hazards to read as follows:

"This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge.

Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA".

5. Include the following re-entry statement: "Reentry into treated swimming pools is prohibited above levels of 3 ppm of chlorine".

A stamped copy of the product label is enclosed for your records.

Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

ISOCYANURATE RED ATTACHMENT A - BATCH 31

LABELING: (Statements are based on review of referenced acute toxicity data)

1. The signal word is "DANGER"
2. Revise the Precautionary Statements to read:

CORROSIVE: Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin, or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

3. Revise the Statement of Practical Treatment to read:

STATEMENT OF PRACTICAL TREATMENT.

IF SWALLOWED: Drink promptly large quantities of water. Do not induce vomiting. Avoid alcohol. Never give anything by mouth to an unconscious person. Call a physician or poison control center immediately.

IF IN EYES: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention.

IF ON SKIN: Wash with plenty of soap and water. Get medical attention.

IF INHALED: Remove victim to fresh air. If not breathing, give artificial respiration, preferably, mouth-to-mouth. Get medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

More Fun/Less Work For Pool Owners

DIRECTIONS FOR USE:

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING

TABEX Slow Dissolving Chlorination Tablets are an extremely concentrated form of swimming pool sanitizing agent. TABEX Chlorination Tablets are designed to dissolve slowly and at a uniform rate thereby eliminating the nuisance of frequent hand feeding of granular or liquid chlorination.

FOR CONTINUOUS DAILY CHLORINATION

Before the first use of TABEX SLOW DISSOLVING CHLORINATION TABLETS, be sure to take the following steps.

- A. Adjust the pool water pH value to between 7.2 and 7.8 as determined by a suitable Test Kit. Further adjust your Total Alkalinity to a minimum of 100 ppm (parts per million).
- B. Stabilize pool water to at least 50 ppm with TABEX Conditioner as directed on container label.
- C. Superchlorinate (SHOCK TREAT) your pool water to a 4 ppm residual chlorine level.
- D. Before first use of this canister, remove bottom cap (to permit water circulation).
- E. Maintain a FREE available chlorine residual of 1.0 to 1.5 ppm by immersing one tablet into the Aquarion Feeder for each 5,000 to 10,000 gallons (18,920 to 37,840 litres) of pool water. Immerse tablets by inserting one or two Feeder Canisters in an operating Aquarion Feeder (the actual number of tablets and canisters required is based upon the length of time your pool pump operates).
- F. If only one canister is used, place dust cover over remaining opening in Feeder top. With canister in the "UP" position and the feeder float collar 13 turns up from the bottom, the lowest tablet in the Feeder Canister will be immersed. DO NOT USE THIS CANISTER IN THE TABEX FLOAT RING.
- G. After the first day, test your pool water with a suitable Test Kit and adjust the feeder as described above to maintain a FREE available chlorine residual of 1.0 to 1.5 ppm.
- H. Superchlorinate (SHOCK TREAT) your pool water at least twice monthly (more often in Sunbelt regions) during hot weather and peak bather loads. Failure to Superchlorinate regularly could result in the growth of Algae in your pool.

**Chlorination Tablets
Feeder Canister**

CONTAINS 100 TABLETS

Net Wt. 2.62 lb.

FILLED TO WEIGHT - APPROXIMATELY 6 TABLETS

**WARNING: KEEP OUT OF REACH
OF CHILDREN**

See other precautions and first aid on side panel

MADE IN CANADA

WARNING: Highly corrosive. Causes skin and eye irritation. Do not get in eyes, on skin or on clothing. Wear eye shield and rubber gloves when handling. Irritating to skin and breathing dust. Remove and wash contaminated clothing.

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds, and aquatic life. Do not use in streams, rivers, ponds, or public waters unless in a permit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS: Strong Oxidizer. Use clean dry vessels. Do not add this product to containers containing remnants of any other product. Such use may lead to fire or explosion. Contamination with other chemicals may start a chemical reaction, with evolution of hazardous gases, and possible generation of fire. In case of contamination or decomposition, do not reuse container. Store in open air or well ventilated area. Flood with water if necessary.

PRACTICAL TREATMENT: (First Aid) If swallowed, follow with olive oil or cooking oil. Call a physician. Brush off excess chemical and flush skin with water. If irritation persists, get medical attention. If water for at least 15 minutes. Get medical attention.

STORAGE AND DISPOSAL: Keep this product dry or, when not in use. Store in a cool, dry, well ventilated area. In case of decomposition, isolate container with large amounts of water to dissolve all water-soluble contents. Do not reuse empty container but place contaminated food or feed by storage or disposal.
