US ENVIRONMENTAL PROTECTION AGENCY OFFICE OF PESTICIDES PROGRAMS REGISTRATION DIVISION (75-767) WASHINGTON, DC 20460	EPA REGISTRATION NO. 7364-46	DATE OF ISSUANCE JAN 24 1997
	TERM OF ISSUANCE	
NOTICE OF PESTICIDE: <input type="checkbox"/> REGISTRATION <input checked="" type="checkbox"/> REREGISTRATION <i>(Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended)</i>	NAME OF PESTICIDE PRODUCT Tabex Algae Out	

NAME AND ADDRESS OF REGISTRANT (Include ZIP code)

Great Lakes Biochemical Co., Inc.
6120 W. Douglas Avenue
Milwaukee, WI 53218

NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

Based on your response to the Reregistration Eligibility Document, EPA has reregistered the above named product subject to the comments recorded in the succeeding paragraph. This action is taken under the authority of section 4(g)(2)(C) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides. EPA may require submission of data at any time to maintain the registration of your product.

Make the following labeling changes before you release the product for shipment:

1. On the right panel above "Danger" add the heading "Precautionary Statements" and "Hazards to Human and Domestic Animals".

2. The Precautionary Statements should read:

"Corrosive: Cause irreversible eye damage. Causes skin irritation. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Avoid breathing dust. Wear goggles or face shield. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse".

ATTACHMENT IS APPLICABLE

SIGNATURE OF APPROVING OFFICIAL _____	DATE _____
---------------------------------------	------------

2044

3. The Statement of Practical Treatment should read:

If Swallowed: Drink promptly large quantities of water. Do not induce vomiting. Avoid alcohol. Call a physician or poison control center immediately.

If in Eyes: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention.

If on Skin: Wash with plenty of soap and water. Get medical attention.

If Inhaled: Remove victim to fresh air. If not breathing, give artificial respiration, preferably, mouth-to-mouth. Get medical attention.

Note to Physician: Probably mucosal damage may contraindicate the use of gastric lavage.

Further suggested types of information in the Note to Physician include the following:

- technical information on symptomatology;
- use of supportive treatments to maintain life functions;
- medicine that will counteract the specific physiological effects of the pesticide;
- company telephone number to specific medical personnel who can provide specialized medical advice.

4. Revise the Environmental Hazards to read as follows:

"This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge.

Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA".

5. Include the following re-entry statement: "Reentry into treated swimming pools is prohibited above levels of 3 ppm of chlorine".

3044

Submit one copy of the final printed labeling before releasing the product in channels of trade with the revised labeling.

Please note that "EPA Reg. No. 320-57" source product for Sodium Dichloro-s-Triazinetrione, is not a valid EPA Reg. No. The correct number for this product is "EPA Reg. No. 230-57" and it has been transferred to "EPA Reg. No. 69470-3. You must submit a revised Confidential Statement of Formula with the above change.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

Tabex[®] Algae Out[™]

CONTAINS NO CALCIUM

Net Wt. 3 lb.

**DANGER: KEEP OUT OF REACH
OF CHILDREN**

See other precautions and first aid on back panel.

Active Ingredients: Sodium Dichloro-s-Triazinetrione 36.7%
Copper expressed as metallic 2.2%
(from Copper Sulfate Pentahydrate)

Inert Ingredients: 61.1%

(Available Chlorine 22.0%)

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters unless in accordance with an NPDES Permit. For guidance contact the regional office of EPA.

PHYSICAL AND CHEMICAL HAZARDS: Strong Oxidizing Agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In

case of contamination or decomposition, do not reuse container. If possible isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

PRACTICAL TREATMENT: (First Aid) If swallowed feed bread soaked in milk followed by olive oil or cooking oil. Call a physician immediately. If on skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention. If in eyes: Flush with cold water for at least 15 minutes. Get medical attention.

STORAGE AND DISPOSAL: Keep this product dry in a tightly closed container, when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding the container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage or disposal, or cleaning of equipment.

Product No. 467

T-467-091581

DIRECTIONS FOR USE:

Algae Out contains a chelated copper sulfate. Algae Out is formulated for immediate anti-algae shock treatment as well as for extended relief from algae. It is not intended to take the place of regular maintenance of chlorine residuals and regular maintenance of algaecide levels. Use Algae Out as follows:

Adjust pool water pH to 7.2-7.8 range with a total water alkalinity range of 100 to 150 ppm (as determined by suitable test kits).

To control pool water algae, distribute 3 pounds over water surface for each 20,000 gallons of pool water. This will raise pool water

chlorine residual to 4 ppm for immediate anti-algae shock treatment and add 1 ppm of chelated copper sulfate for extended algae relief.

3. For best results, use Tabex Algae Out in evening after pool use is discontinued for the day. Before using pool again, allow chlorine residual to return to 1.0-1.5 ppm level as determined by use of a suitable chlorine test kit.

4. If algae persists, repeat dosage.
