

FIRST AID

IF SWALLOWED: Call a poison control center immediately for treatment advice. Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or a doctor. Do not give anything by mouth to an unconscious person.

IF IN EYES: Hold eyelids open and rinse slowly with water for 15 to 20 minutes. Remove contact lenses if present after 5 minutes, then continue rinsing eye. Call poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

ACTIVE INGREDIENTS:

Sodium Dichloro-s-Triazinetrione.....36.7%
Copper Sulfate..... 2.2%
(from Copper Sulfate Pentahydrate)

INERT INGREDIENTS:.....61.1%
(available Chlorine 22.0%)

TOTAL.....100.0%

**KEEP OUT OF REACH OF CHILDREN
DANGER**

Alpharetta, GA 30004

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This product contains a chelated copper sulfate. This product is formulated for immediate anti-algae shock treatment as well as for extended relief from algae. It is not intended to take the place of regular maintenance of algaecide levels. For best results, use this product in evening after pool use is discontinued for the day.

Use this product as follows:

1. Adjust pool water pH to 7.2 - 7.8 range with a total water alkalinity range of 100 to 150 ppm each as determined by suitable test kits.
2. To control pool water algae, distribute 3 pounds over water surface for each 20,000 gallons of pool water (for 10,000 gallons, use ½ jar, etc.). This will raise pool water chlorine residual to 4 ppm for immediate anti-algae shock treatment and 1 ppm of chelated copper sulfate for extended relief.
3. Repeat dosage as needed to keep pool water clean.

**REENTRY INTO TREATED SWIMMING POOLS IS PROHIBITED ABOVE
LEVELS OF 3 PPM OF CHLORINE**

Unlike many other algaecides, this product will not combine with and neutralize chlorine residuals already in the pool. This means that this product and chlorine in your pool will work together rather than destroying each other. In addition, this product will not upset the pH balance of your pool: it is buffered.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER:**

CORROSIVE, Causes irreversible eye damage. Causes skin irritation. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Avoid breathing dust. Wear goggles or face shield. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

PHYSICAL OR CHEMICAL HAZARDS

Strong oxidizing agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction, with generation of heat, liberation of hazardous gases, and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic organisms.

STORAGE & DISPOSAL

Keep this product dry in a tightly closed container, when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding the container. Do not reuse empty container but place in trash container. Do not contaminate food or feed by storage or disposal, or cleaning of equipment.
