DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This product contains a chelated copper sulfate. This product is formulated for immediate anti-algae shock treatment as well as for extended relief from algae. It is not intended to take the place of regular maintenance of algaecide levels. For best results, use this product in evening after pool use is discontinued for the day.

Use this product as follows:

1. Adjust pool water pH to 7.2 - 7.8 range with a total water alkalinity range of 100 to 150 ppm each as determined by suitable test kits.
2. To control pool water algae, distribute 3 pounds over water surface for each 20,000 gallons of pool water (for 10,000 gallons, use 1/2 jar, etc.). This will raise pool water chlorine residual to 4 ppm for immediate anti-algae shock treatment and 1 ppm of chelated copper sulfate for extended relief.
3. Repeat dosage as needed to keep pool water clean.

REENTRY INTO TREATED SWIMMING POOLS IS PROHIBITED ABOVE LEVELS OF 3 PPM OF CHLORINE

Unlike many other algaecides, this product will not combine with and neutralize chlorine residuals already in the pool. This means that this product and chlorine in your pool will work together rather than destroying each other. In addition, this product will not upset the pH balance of your pool: it is buffered.
